

UNIT TEST DOCUMENT		Module Name	WEBSITE ONLINE BOOKING MODULE	
Test Cycle No.	1	Component Name	WEBSITE APPOINTMENT REQUEST	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Appointment page is open			
Action Description	Submit online booking request			
Verification Steps	Fill form, submit, and check message/result			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete required fields	Success modal must display with title <i>“Request received”</i>		PASSED
2	Empty required field	The message must display <i>“Field is required”</i>		PASSED
3	Invalid Phone Number format	The message must display <i>“Phone number must start with 9”</i>		PASSED
4	Invalid Email Address format	The message must display <i>“Enter a valid email address”</i>		PASSED
5	Privacy Policy not checked	The message must display <i>“Please agree to the data privacy notice before submitting”</i>		PASSED
6	Captcha not completed	The message must display <i>“Please compete the Captcha before submitting”</i>		PASSED

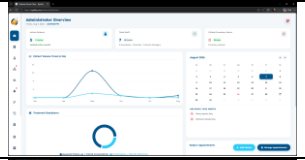

UNIT TEST DOCUMENT		Module Name	REGISTRATION MODULE
--------------------	--	-------------	---------------------

Test Cycle No.	1	Component Name	PATIENT PRE-REGISTRATION	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Unregistered patient booked an appointment online			
Action Description	Pre-register patient form must be validated			
Verification Steps	Complete pre-registration form and check email for link verification			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display <i>"Thank you! Your registration details have been completed. Please check your email for the activation link sent by the clinic, then open it and set up your password."</i>		PASSED
2	Empty required fields	The message must display <i>"Required"</i>		PASSED
	Patient is a minor	The guardian information must be required		PASSED
3	Invalid home phone number format	The message must display <i>"Invalid landline format"</i>		PASSED
4	Invalid work phone number format	The message must display <i>"Invalid landline format"</i>		PASSED
5	Invalid mobile number format	The message must display <i>"Invalid format (9xxxxxxxxx)"</i>		PASSED
6	Data and Privacy Consent not acknowledge	The message must display <i>"Please review the full data privacy notice before submitting"</i>		PASSED

7	Digital Dental Consent not acknowledge	The message must display <i>"Please review the full consent form before submitting"</i>		PASSED
	Invalid, expired, or already completed pre-registration link	The message must display <i>"This link has expired or is invalid. Please contact the clinic for assistance."</i>		PASSED

UNIT TEST DOCUMENT		Module Name	REGISTRATION MODULE		
Test Cycle No.	1	Component Name	SET-UP PASSWORD		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Staff/patient already registered				
Action Description	The password must be validated				
Verification Steps	The password must set and the login page must display				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Password and confirm password matched	The message must display “Account activated successfully. Your password is now set.”		PASSED	
2	Invalid password format	The enter button must be disabled		PASSED	
3	Password and confirm password do not match	The message must display “Passwords do not match”		PASSED	
4	Empty password and confirm new password	The Activate Account button must be disabled		PASSED	

	Invalid or expired activation link	The message must display <i>“Activation Unavailable. Invalid or expired activation link.”</i>		PASSED
--	------------------------------------	---	--	--------

UNIT TEST DOCUMENT		Module Name	LOGIN MODULE	
Test Cycle No.	1	Component Name	LOGIN	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Browser opened; account exists			
Action Description	The email and password must be validated			
Verification Steps	The dashboard must display			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Correct email and password	The dashboard must display		PASSED
2	Correct email and incorrect password	The message must display "Invalid email or password"		PASSED
3	Incorrect email and correct password	The message must display "Invalid email or password"		PASSED
4	Incorrect email and password	The message must display "Invalid email and password"		PASSED
5	Empty email and password	The message must display "Email address is required" and "Password is required"		PASSED

6	Too many failed login attempts	The message must display <i>"Too many login attempts. Please try again in 15 minutes."</i>		PASSED
---	--------------------------------	--	--	--------

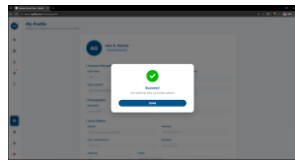

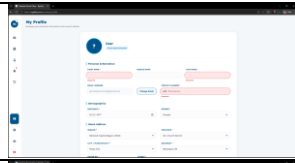

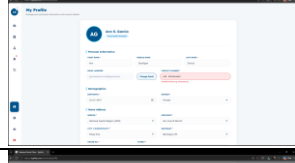

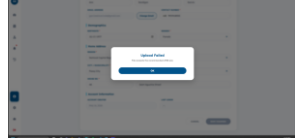

UNIT TEST DOCUMENT		Module Name	LOGIN MODULE		
Test Cycle No.	1	Component Name	FORGOT PASSWORD		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Click “Forgot Password” on the login page				
Action Description	The email must be validated				
Verification Steps	The verification methods page must display				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Enter email address	The verification code page must display		PASSED	
2	Empty email address field	The message must display “Please enter your email address”		PASSED	

UNIT TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.	1	Component Name	FORGOT PASSWORD - OTP
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Enter email in the Forgot Password page		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		

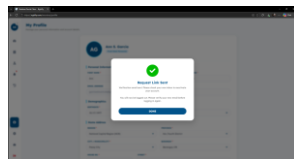

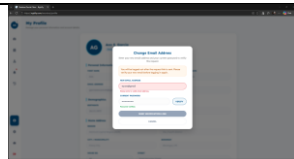

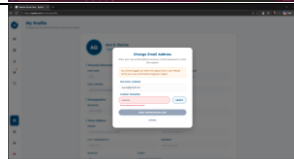

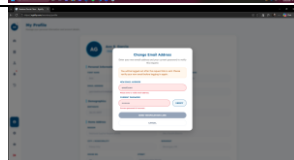

Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Correct OTP	The reset password page must display		PASSED
2	Incorrect OTP	The message must display "Invalid or expired OTP"		PASSED
3	Resend OTP	The message must display "New code sent" and the resend countdown must restart		PASSED

UNIT TEST DOCUMENT		Module Name	LOGIN MODULE	
Test Cycle No.	1	Component Name	RESET PASSWORD	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Enter the valid OTP in the OTP page			
Action Description	The new and confirm new password must be validated			
Verification Steps	The password must be reset and the login page must display			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	New and confirm new password matched	The Successful Password Change page must display		PASSED
2	Invalid new password format	The enter button must be disabled		PASSED
3	New and confirm new password do not match	The message must display “Passwords do not match”		PASSED

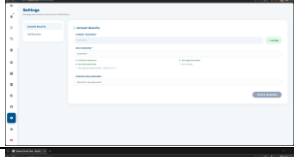

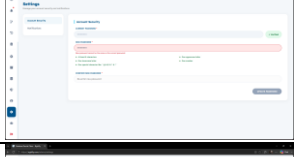

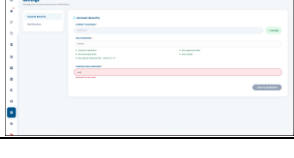

4	Empty new password and confirm new password	The enter button must be disabled		PASSED
---	---	-----------------------------------	--	--------

UNIT TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE		
Test Cycle No.	1	Component Name	EDIT PROFILE		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”				
Action Description	The user details must be validated				
Verification Steps	The user details must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete required fields	A confirmation message must appear, and once confirmed, it must say “Success! Your profile has been successfully updated”		PASSED	
2	Empty required fields	The message must display “Required”		PASSED	
3	Invalid Contact Number format	The message must display “Invalid format (e.g. 9xxxxxxxxx)”		PASSED	
4	File size exceeds 2MB limit	The message must display “Upload Failed. File exceeds the recommended 2mb size”		PASSED	

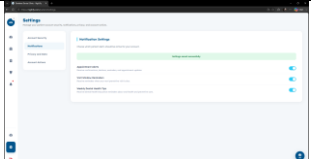

UNIT TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE		
Test Cycle No.	1	Component Name	CHANGE EMAIL		

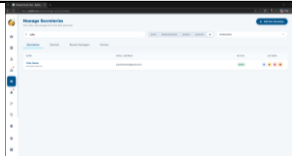

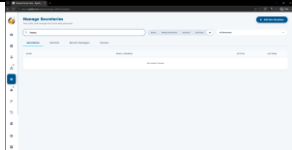

Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click the “My Profile” from the sidebar and click “Change Email”			
Action Description	The email and password must be validated			
Verification Steps	The email must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Valid Email Address format and correct password	The message must display “Request Link Sent. Verification email sent. Please check your inbox to reactivate your account. You will now be logged out. Please verify your new email before logging in again.”		PASSED
2	Invalid Email Address format	The message must display “Please enter a valid email address”		PASSED
3	Valid Email Address format and incorrect password	The message must display “Current password is incorrect”		PASSED
4	Invalid Email Address format and incorrect password	The message must display “Please enter a valid email address” and “Current password is incorrect”		PASSED
5	New email is same as the Current Email Address	The message must display “New email must be different from the current email.”		PASSED

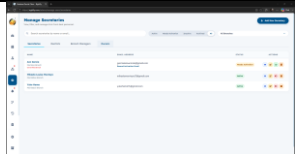

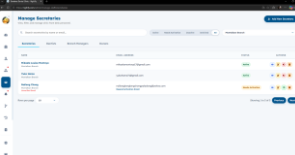

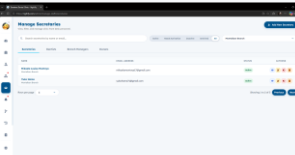

UNIT TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.	1	Component Name	CHANGE PASSWORD
Date Tested	08/06/2026	Type of System	Web Application

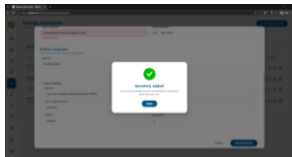

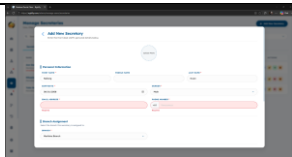

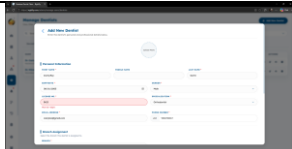

Pre-conditions	Login in, click the “Settings” from the sidebar and click “Account Security”			
Action Description	The current password, new password, and confirm new password must be validated			
Verification Steps	The password must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Correct Current Password, correct New Password format, and New and Confirm New Password Match.	The message must display “ <i>Success! Your password has been changed. For your security, you will now be logged out. Please log back with your new password</i> ”		PASSED
2	Empty Required fields	The Update Password button must be disabled		PASSED
3	Incorrect Current Password	The message must display “ <i>Incorrect current password</i> ”		PASSED
4	Incorrect New Password requirements	The password requirements checklist must be unchecked		PASSED
5	New Password is same as the Current Password	The message must display “ <i>New password cannot be the same as the current password</i> ”		PASSED
6	New Password and Confirm New Password do not match	The message must display “ <i>Passwords do not match</i> ”		PASSED

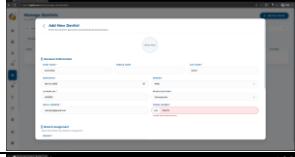

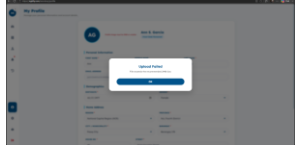

UNIT TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.	1	Component Name	NOTIFICATIONS
Date Tested	08/06/2026	Type of System	Web Application

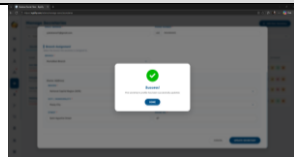

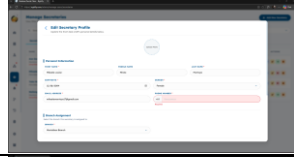

Pre-conditions	Login, click settings from the sidebar and open Notifications			
Action Description	The Notification preferences must be updated			
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Enable or disable each available notification preference	The message must display <i>"Settings saved successfully"</i>		PASSED
2	Reopen Notifications	The previously saved notification preferences must load correctly		PASSED

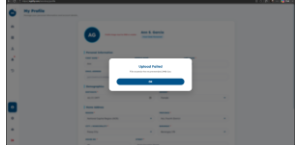

UNIT TEST DOCUMENT		Module Name	STAFFS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	SEARCH/FILTER STAFF	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Staffs from the sidebar			
Action Description	Search returns matching staff records for valid input and no results for invalid input			
Verification Steps	Verify that all employees matching the search criteria are display in the results			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Valid search by name or email	The table updates to show only the staff(s) whose name/email matches the search input		PASSED
2	No match case	The message must display “No results found”		PASSED

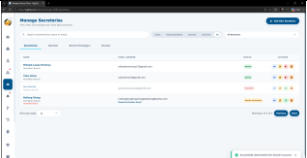

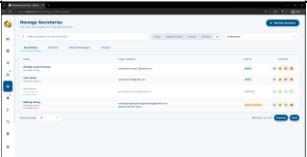

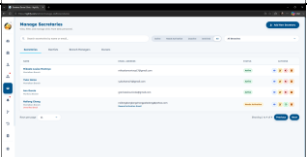

3	Empty search	The table shows records based on the configured rows per page and current page.		PASSED
4	Filter by available role, lifecycle status, or branch	The table updates to show only the staff/s matching the selected filter/s		PASSED
5	Change rows per page or navigate to another page	The table shows records based on the configured rows per page and current page		PASSED

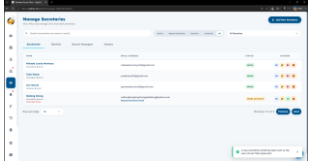

UNIT TEST DOCUMENT		Module Name	STAFFS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	ADD NEW STAFF	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Staffs from the sidebar then click the Add New *Selected Staff Role Tab* button			
Action Description	The staff’s information must be validated			
Verification Steps	The new staff must be added to the staffs list			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display “*Selected Staff Role* Added! The account has been created successfully. An activation email has been sent.”		PASSED
2	Empty required fields	The message must display “Required”		PASSED
3	Invalid License Number (For Dentists only)	The message must display “Must be 7 digits”		PASSED

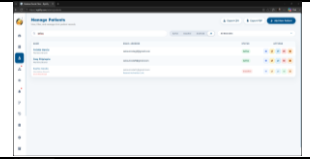

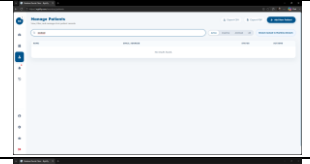

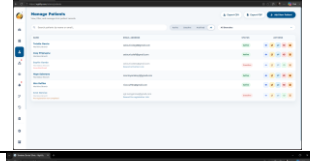

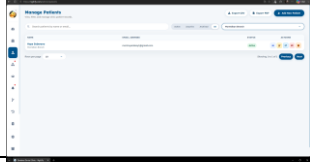

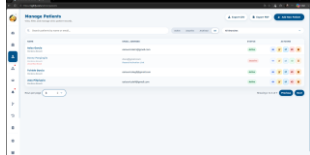

4	Invalid email domain	The message must display <i>"Invalid email domain"</i>		PASSED
5	Invalid phone number format	The message must display <i>"Invalid format (9xxxxxxxx)"</i>		PASSED
6	File size exceeds 2MB limit	The message must display <i>"Upload Failed. File exceeds the recommended 2mb size"</i>		PASSED

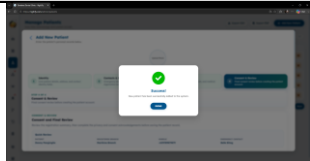

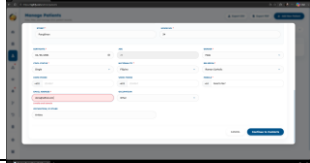

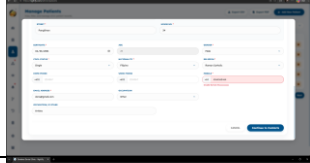

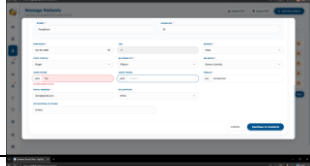

UNIT TEST DOCUMENT		Module Name	STAFFS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	EDIT STAFF INFO	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list and click the edit button			
Action Description	The staff’s information must be validated			
Verification Steps	The staff’s information must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display “Success! The *Selected Staff’s Role* profile has been successfully updated.”		PASSED
2	Empty required fields	The message must display “Required”		PASSED
3	Invalid License Number (For Dentists only)	The message must display “Must be 7 digits”		PASSED

4	Invalid email domain	The message must display <i>"Invalid email domain"</i>		PASSED
5	Invalid phone number format	The message must display <i>"Invalid format (9xxxxxxxx)"</i>		PASSED
6	File size exceeds 2MB limit	The message must display <i>"Upload Failed. File exceeds the recommended 2mb size"</i>		PASSED

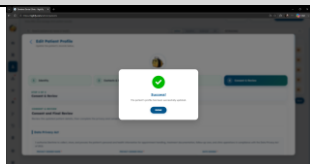

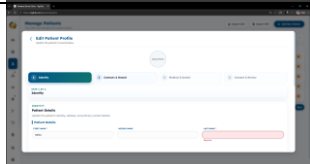

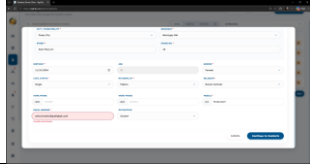

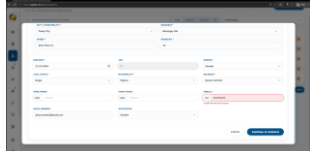

UNIT TEST DOCUMENT		Module Name	STAFFS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	STAFF ACCOUNT LIFECYCLE	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list			
Action Description	Activate, deactivate, archive, restore, or reissue staff account access			
Verification Steps	The staff’s status must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Activate or deactivate selected account	The staff’s account status must be updated successfully after confirmation		PASSED
2	Archive staff	The staff record must be moved to the archived state		PASSED
3	Restore archived staff and confirm	The staff record must be restored		PASSED

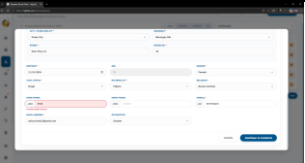

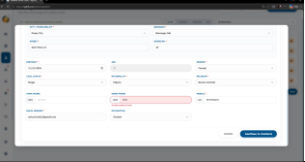

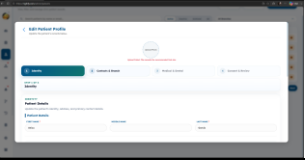

4	Reissue activation email to an eligible staff account	The staff activation email must be sent successfully		PASSED
---	---	--	--	--------

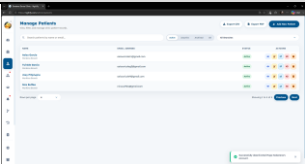

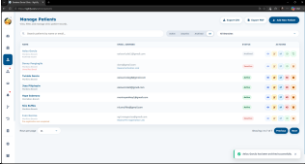

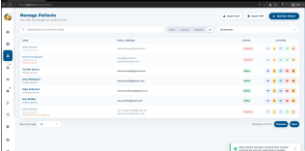

UNIT TEST DOCUMENT		Module Name	PATIENTS MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	SEARCH/FILTER PATIENT		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Manage Patients from the sidebar				
Action Description	Search returns matching patient records for valid input and no results for invalid input				
Verification Steps	Verify that all patients matching the search criteria are displayed in the results				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Valid search by name or email	The table updates to show only the patient(s) whose name/email matches the search input		PASSED	
2	No match case	The message must show “No results found”		PASSED	
3	Empty search	Table shows records based on the configured rows per page and current page		PASSED	
4	Filter by lifecycle status or branch	The table updates to show only the patient/s matching the selected filter/s		PASSED	
5	Change rows per page or navigate to another page	The table shows records based on the configured rows per page and current page		PASSED	

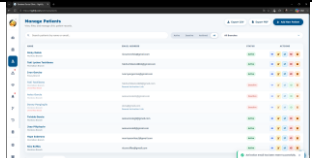

UNIT TEST DOCUMENT		Module Name	PATIENTS MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	ADD NEW PATIENT		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Manage Patients from the sidebar then click the Add New Patient button				
Action Description	The patient’s information must be validated				
Verification Steps	The new patient must be added to the patients’ list				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid required fields	The message must display “New patient has been successfully added to the system”		PASSED	
2	Empty required fields	The message must display “Required”		PASSED	
4	Invalid email domain	The message must display “Invalid email domain”		PASSED	
5	Invalid mobile number format	The message must display “Invalid format (9xxxxxxxx)”		PASSED	
6	Invalid home phone number format	The message must display “Invalid landline format”		PASSED	
7	Invalid work phone number format	The message must display “Invalid landline format”		PASSED	
8	File size exceeds 2MB limit	The message must display “Upload Failed. File exceeds the recommended 2mb size”		PASSED	

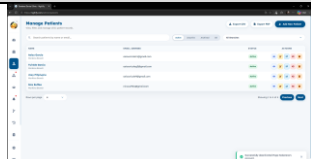

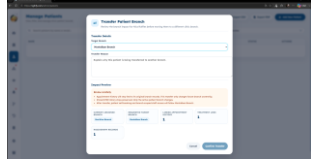

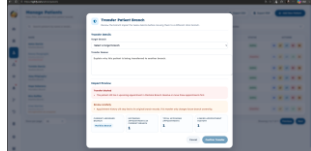

9	Data and Privacy Consent not acknowledge	The message must display <i>"Data privacy consent has not been acknowledged yet"</i>		PASSED
10	Dental Consent not acknowledge	The message must display <i>"Consent has not been acknowledged yet"</i>		PASSED

UNIT TEST DOCUMENT		Module Name	PATIENTS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	EDIT PATIENT	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Patients from the sidebar then select a patient from the list and click the edit button			
Action Description	The patient’s information must be validated			
Verification Steps	The patient’s information must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display “Success! The patient’s profile has been successfully updated.”		PASSED
2	Empty required fields	The message must display “Required”		PASSED
4	Invalid email domain	The message must display “Invalid email domain”		PASSED
5	Invalid phone number format	The message must display “Invalid format (9xxxxxxxx)”		PASSED

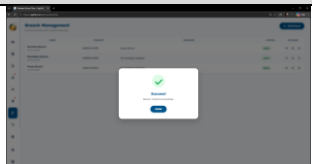

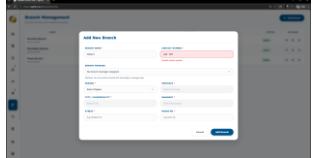

6	Invalid home phone number format	The message must display <i>"Invalid landline format"</i>		PASSED
7	Invalid work phone number format	The message must display <i>"Invalid landline format"</i>		PASSED
8	File size exceeds 2MB limit	The message must display <i>"Upload Failed. File exceeds the recommended 2mb size"</i>		PASSED

UNIT TEST DOCUMENT		Module Name	PATIENTS MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	PATIENT ACCOUNT LIFECYCLE	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Patients from the sidebar then select a patient from the list			
Action Description	Activate, deactivate, archive, restore, or send patient access email			
Verification Steps	The patient’s account status must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Activate or deactivate selected account	The patient’s account status must be updated successfully after confirmation		PASSED
2	Archive patient	The patient record must be archived without deleting preserved clinical history		PASSED
3	Restore archived patient and confirm	The patient record must be restored		PASSED

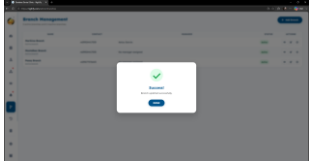

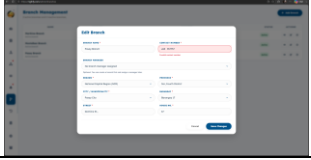

4	Reissue activation email to an eligible patient account	The patient activation email must be sent successfully		PASSED
---	---	--	--	--------

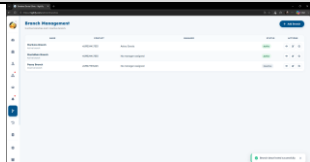

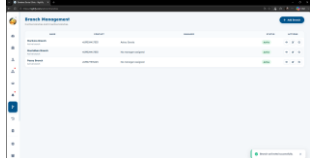

UNIT TEST DOCUMENT		Module Name	PATIENTS MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	PATIENT BRANCH TRANSFER		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Manage Patients from the sidebar then select a patient from the list				
Action Description	Transfer patient to another branch				
Verification Steps	The patient’s branch assignment must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Valid target branch and valid transfer reason	The patient branch assignment must update successfully to the selected target branch		PASSED	
2	Empty target branch	The Confirm Transfer button must be disabled		PASSED	
3	Empty transfer reason	The Confirm Transfer button must be disabled		PASSED	
4	Patient has upcoming appointment	The transfer must be blocked		PASSED	

UNIT TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE		
--------------------	--	-------------	--------------------------	--	--

Test Cycle No.	1	Component Name	ADD BRANCH	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Branches from the sidebar then click Add Branch button			
Action Description	The new branch information must be validated			
Verification Steps	The new branch must be added to the branches' list			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display <i>"Success! Branch created successfully."</i>		PASSED
2	Empty required fields	The message must display <i>"Required"</i>		PASSED
3	Invalid Contact Number format	The message must display <i>"Invalid contact number"</i>		PASSED

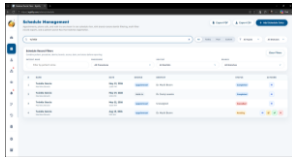

UNIT TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	EDIT BRANCH	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Branches from the sidebar then select a branch and click the edit button			
Action Description	The branch information must be validated			
Verification Steps	The branch information must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks

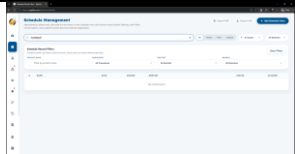

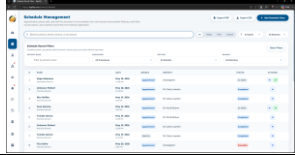

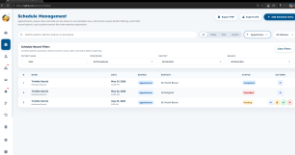

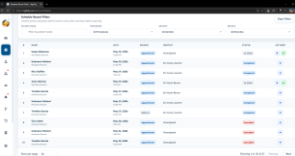

1	Complete and valid required fields	The message must display <i>"Success! Branch updated successfully."</i>		PASSED
2	Empty required fields	The message must display <i>"Required"</i>		PASSED
3	Invalid Contact Number format	The message must display <i>"Invalid contact number"</i>		PASSED

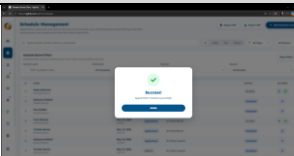

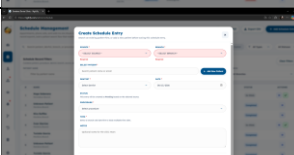

UNIT TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	BRANCH STATUS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Branches from the sidebar then select a branch			
Action Description	Activate or deactivate a branch			
Verification Steps	The branch status must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Deactivate an active branch	The branch must be deactivated successfully		PASSED
2	Activate an inactive branch	The branch must be activated successfully		PASSED

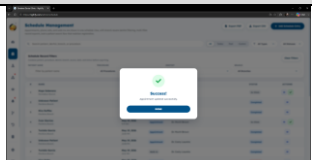

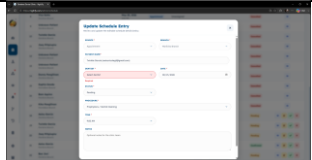

UNIT TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE	
--------------------	--	-------------	--------------------------	--

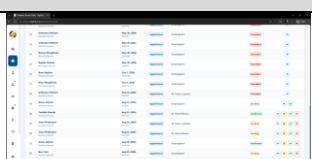

Test Cycle No.	1	Component Name	BRANCH ANALYTICS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Branches from the sidebar then select a branch and click view button			
Action Description	View branch analytics			
Verification Steps	The branch analytics must display			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Selected branch has analytics data	The branch analytics must display		PASSED
2	Selected branch has no analytics data	The message must display “No status data yet” and “No monthly activity yet”		PASSED

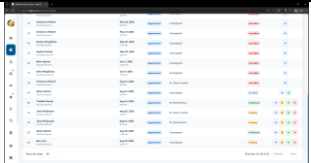

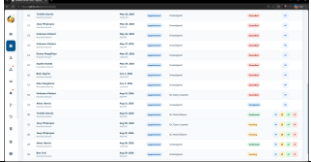

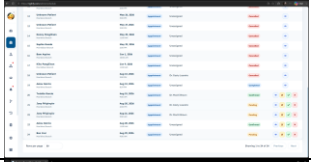

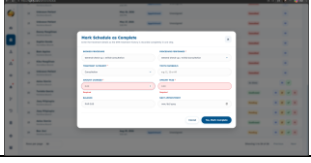

UNIT TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	SEARCH/FILTER SCHEDULE	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Schedule from the sidebar			
Action Description	Search returns matching schedule records for valid input and no results for invalid input			
Verification Steps	Verify that all schedule matching the search criteria are displayed in the results			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Valid search by name or email	The table updates to show only the schedule(s) that matches the patient, dentist, branch, and procedure search input		PASSED

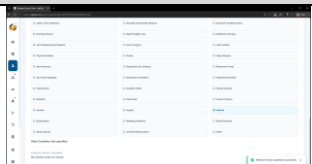

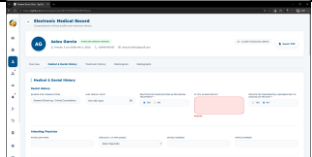

2	No match case	The message must show <i>"No results found"</i>		PASSED
3	Empty search	Table shows records based on the configured rows per page and current page		PASSED
4	Filter by patient, procedure, dentist, status, branch, type, or date	The table updates to show only the schedule/s matching the selected filter/s		PASSED
5	Change rows per page or navigate to another page	The table shows records based on the configured rows per page and current page		PASSED

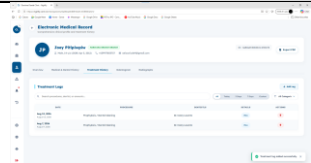

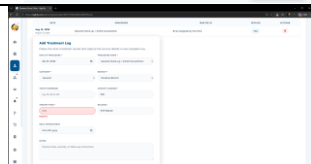

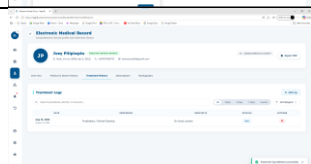

UNIT TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	ADD SCHEDULE	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Schedule from the sidebar then click Add Schedule Entry button			
Action Description	The schedule information must be valid			
Verification Steps	The schedule must be added to the schedule list			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The message must display “Success! Appointment created successfully”		PASSED
2	Empty required fields	The message must display “Required”		PASSED

UNIT TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	EDIT SCHEDULE/RESCHEDULE		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Schedule from the sidebar then select a schedule entry and click the edit button				
Action Description	The schedule information must be valid				
Verification Steps	The schedule must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid required fields	The message must display “Success! Appointment updated successfully.”		PASSED	
2	Empty required fields	The message must display “Required”		PASSED	

UNIT TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	SCHEDULE STATUS MANAGEMENT		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Schedule from the sidebar then select a schedule from the list				
Action Description	Update appointment status				
Verification Steps	The appointment status must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Update schedule status to Confirmed	The schedule status must display Confirmed		PASSED	

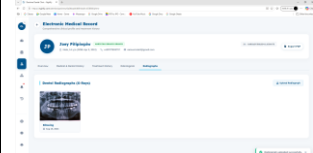

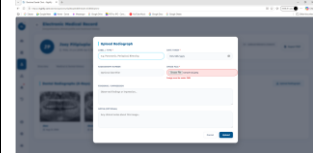

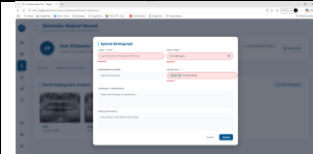

2	Update schedule status to In Clinic	The schedule status must display In Clinic		PASSED
3	Update schedule status to Cancel	The schedule status must display Cancelled		PASSED
4	Complete and valid required fields	The schedule status must display Completed		PASSED
5	Empty required field	The schedule status must display In Clinic		PASSED

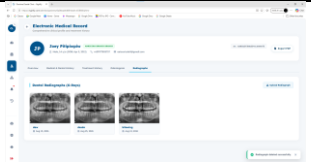

UNIT TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.	1	Component Name	MEDICAL AND DENTAL HISTORY	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Medical & Dental History			
Action Description	Update patient’s medical & dental history			
Verification Steps	The patient’s medical & dental history must be updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The medical and dental history must save successfully		PASSED
2	Empty required fields	The message must display “Required”		PASSED

UNIT TEST DOCUMENT		Module Name	PATIENT EMR MODULE		
Test Cycle No.	1	Component Name	TREATMENT LOGS		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to treatment logs				
Action Description	Add or delete treatment logs				
Verification Steps	The patient’s treatment log must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid required fields	The treatment log must be added successfully and appear in the patient EMR		PASSED	
2	Empty required fields	The message must display “Required”		PASSED	
3	Delete treatment log	The treatment log must be removed successfully		PASSED	

UNIT TEST DOCUMENT		Module Name	PATIENT EMR MODULE		
Test Cycle No.	1	Component Name	INTERACTIVE DIGITAL ODONTOGRAM		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in as Dentist, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to digital odontogram				
Action Description	Manage digital odontogram				
Verification Steps	The patient’s digital odontogram must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	

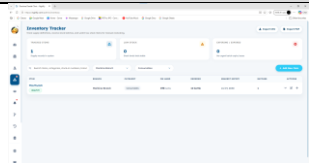

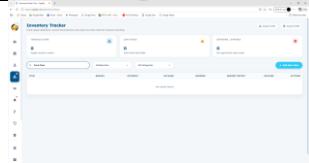

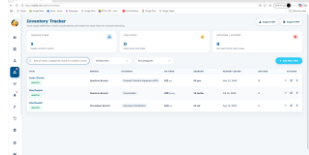

1	Save a valid supported tooth condition, surface, or stage	The digital odontogram must display the patient's current tooth data		PASSED
---	---	--	--	--------

UNIT TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.	1	Component Name	AI-ASSISTED RADIOGRAPH ENHANCEMENT	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Dentist, click Manage Patients from the sidebar then select patient from the list, click View button, and navigate to Radiograph Images			
Action Description	Upload, review, verify, and manage patient’s radiograph images with AI-assisted review			
Verification Steps	Upload radiograph image, review AI-assisted findings, verify dentist actions, and check patient radiograph availability			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Upload radiograph image under 3MB image-size limit with complete required fields	The radiograph must upload successfully and appear in the patient record		PASSED
2	Image-size limit exceeds 3MB	The message must display “Image must be under 3MB”		PASSED
3	Empty required field	The message must display “Required”		PASSED
4	Generate AI-assisted radiograph review	The AI-assisted review result must display successfully in the radiograph review panel		
5	Review radiograph with AI-assisted suggestions	The AI-assisted suggestions must display without automatically changing the patient’s clinical record		
6	Confirm AI-assisted suggestion	The confirmed finding must be saved successfully in the		

		radiograph review record		
7	Correct AI-assisted suggestion	The corrected finding must be updated successfully in the radiograph review record		
8	Ignore AI-assisted suggestion	The ignored suggestion must not appear as a confirmed clinical finding		
9	Approve dentist-reviewed radiograph summary	The approved radiograph summary must become available for patient viewing		
10	Dentist rejects AI-assisted radiograph summary	The rejected summary must not appear as a confirmed clinical finding		
11	Delete radiograph	The radiograph must be removed successfully		PASSED

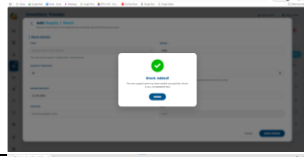

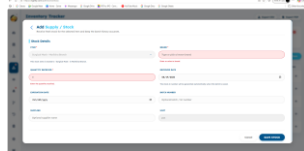

UNIT TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.	1	Component Name	PATIENT RADIOGRAPH EXPLANATION	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient and click Medical Records from the sidebar			
Action Description	View dentist-approved radiograph information and AI explanation			
Verification Steps	Open Radiograph Images and verify the available radiograph explanation information			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Patient has approved radiograph image with dentist findings	The radiograph image and dentist-approved findings must display		
2	Patient has approved radiograph explanation	The AI explanation must display based only on dentist-approved findings		
3	Patient has pending radiograph review	The radiograph review information must not display		

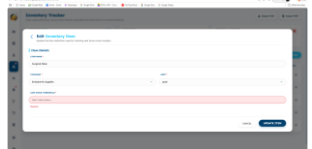

4	Patient has no approved radiograph record	The message must display "No radiographs yet"		
5	Patient requests diagnosis from radiograph explanation	The AI must not provide a diagnosis and must recommend consulting the dentist		

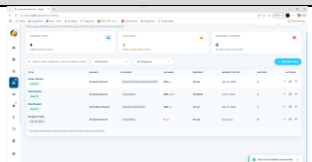

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	SEARCH/FILTER INVENTORY	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Inventory from the sidebar			
Action Description	Search/filter returns matching inventory records for valid input and no results for invalid input			
Verification Steps	Verify that all inventory matching the search and filter criteria are displayed in the results			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Valid search or filter by item, category, brand, batch, or branch	Only the inventory records matching the selected search/filter criteria must display		PASSED
2	No match case	The message must display “No results found”		PASSED
3	Empty search	The table shows records based on the configured rows per page and current page		PASSED

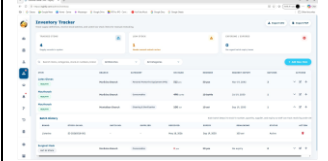

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	ADD NEW INVENTORY ITEM	
Date Tested	08/06/2026	Type of System	Web Application	

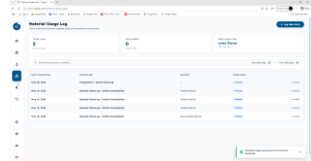

Pre-conditions	Login in, click Inventory from the sidebar and click Add New Item button			
Action Description	The inventory item information must be validated			
Verification Steps	The inventory item must be added to the inventory list			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The new inventory item must be created successfully and appear in the inventory tracker		PASSED
2	Empty required fields	The message must display "Required"		PASSED

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE	
Test Cycle No.	1	Component Name	ADD INVENTORY STOCK	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Inventory from the sidebar and choose Add Stock/Receive Stock			
Action Description	The new stock batch information must be validated			
Verification Steps	The new stock batch must be added to the batch list			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The stock batch must be added successfully and the available stock must update		PASSED
2	Empty required fields	The message must display "Required"		PASSED

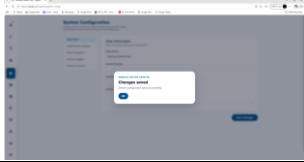

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	EDIT INVENTORY ITEM		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Inventory from the sidebar and click the edit button				
Action Description	The inventory item information must be validated				
Verification Steps	The inventory item information must be updated				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid required fields	The inventory item must be updated successfully		PASSED	
2	Empty required fields	The message must display "Required"		PASSED	

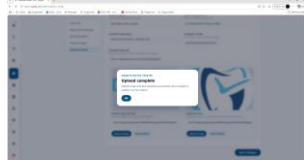

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	DELETE STOCK BATCH		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Inventory from the sidebar, select a stock and click the delete button				
Action Description	Delete a selected inventory stock batch				
Verification Steps	The inventory stock batch must be removed				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Selected a batch and deletion is confirmed	The message must display “Stock batch deleted successfully” and the selected batch must be removed		PASSED	

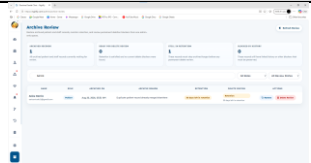

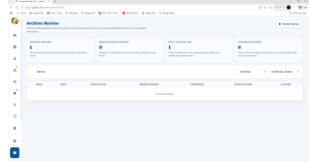

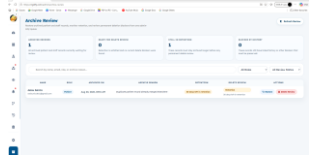

2	Selected a batch and deletion is cancelled	The stock batch must remain in the inventory		PASSED
---	--	--	--	--------

UNIT TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE		
Test Cycle No.	1	Component Name	MATERIAL USAGE LOG		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Material Usage Log from the side bar then click Log New Entry button				
Action Description	Log materials used for a completed appointment				
Verification Steps	The logged materials must be added to the list				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid required fields	The material usage log must save successfully and the corresponding inventory quantities must decrease		PASSED	
2	Empty required fields	The message must display "Required"		PASSED	

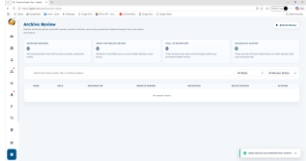

UNIT TEST DOCUMENT		Module Name	SYSTEM CONFIGURATION MODULE
Test Cycle No.	1	Component Name	UPDATE SYSTEM CONFIGURATION
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login in, click System Configuration from the side bar		
Action Description	Validate and save global system configuration settings		
Verification Steps	The system configuration settings must be updated		

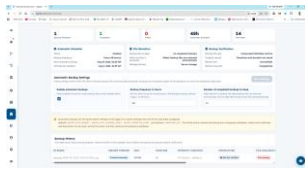

Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields	The system configuration must save successfully		PASSED
2	Empty required fields	The message must display "Required"		PASSED

UNIT TEST DOCUMENT		Module Name	SYSTEM CONFIGURATION MODULE		
Test Cycle No.	1	Component Name	WEBSITE CONTENT AND MEDIA		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login, click System Configuration from the sidebar then navigate to Website Content				
Action Description	The website content and media must be validated				
Verification Steps	Update the website content or media, save the changes, and verify the updated information				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Complete and valid website content	The message must display “System configuration saved successfully”		PASSED	
2	Upload valid Website Logo with Text image file under 20MB	The message must display “Website Logo with Text uploaded successfully. Save Changes to publish it on website”			
3	Upload a non-image file	The message must display “Please select a valid image file”			
4	Upload Website Logo with Text image file that exceeds 20MB	The selected image must not be uploaded			
5	Save website content and reopen System Configuration	The previously saved website content and media must load correctly			

UNIT TEST DOCUMENT		Module Name	ARCHIVE REVIEW MODULE	
Test Cycle No.	1	Component Name	SEARCH/FILTER ARCHIVE RECORDS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Archive Review from the sidebar			
Action Description	Search/filter returns matching archived records for valid input and no results for invalid input			
Verification Steps	Verify that all archived records matching the search and filter criteria are displayed in the results			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Valid search or filter by name, email, role, archive reason, or review state	Only the archived records matching the selected search/filter criteria must display		PASSED
2	No match case	The message must display “No results found”		PASSED
3	Empty search	The table shows records based on the configured rows per page and current page		PASSED

UNIT TEST DOCUMENT		Module Name	ARCHIVE REVIEW MODULE			
Test Cycle No.	1	Component Name	RESTORE/PERMANENT DELETE REVIEW			
Date Tested	08/06/2026	Type of System	Web Application			
Pre-conditions	Login in, click Archive Review from the sidebar and archived records must exist					
Action Description	Restore or permanently delete an archived record					
Verification Steps	The archived record’s state must be restored/deleted					
Test Scenario	Data (Input Values)	Expected Results		Actual Results		Remarks

1	Restore and confirm an archived record	The record must be restored		PASSED
2	Permanently delete an archived record	The record must be permanently deleted		PASSED

UNIT TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE		
Test Cycle No.	1	Component Name	BACKUP STATUS AND HISTORY		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login, click Database Backup from the sidebar				
Action Description	View the database backup status and history				
Verification Steps	Verify the backup status, history, file availability, and verification result				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Existing backup records	The backup history must display the existing backup records with their corresponding status, file availability, and verification result		PASSED	
2	No existing backup	The message must display “No backups have been created yet. Click Create Backup Now to create the first database backup file”			
3	Click Refresh	The message must display “Backup information refreshed successfully”		PASSED	

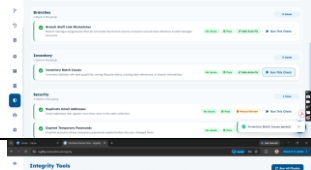

UNIT TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE		
Test Cycle No.	1	Component Name	CREATE DATABASE BACKUP		

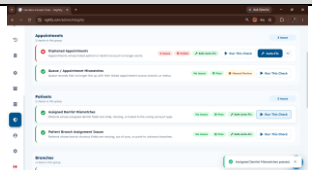

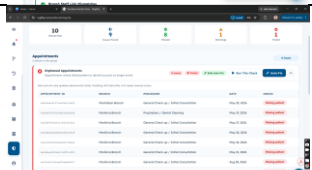

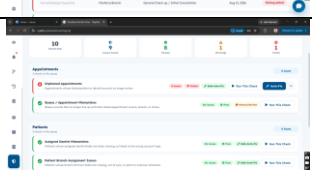

Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login in, click Database Backup from the sidebar and click Create Backup Now button			
Action Description	Create a manual database backup			
Verification Steps	Verify the progress/result and backup history			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Backup tools available and no backup currently running	The backup must be created successfully and appear in the backup history		PASSED
2	Another backup is already running	The in-progress must display and duplicate backup must be prevented		PASSED

UNIT TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE	
Test Cycle No.	1	Component Name	AUTOMATIC BACKUP SETTINGS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login, click Database Backup from the sidebar and navigate to Automatic Backup Settings			
Action Description	The automatic backup settings must be validated			
Verification Steps	Enable or disable automatic backup, update the schedule settings, save, and verify persistence			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Enable automatic backups, Backup frequency = 24 hours, Number of completed backups to keep = 14	The message must display “Backup settings saved successfully”		PASSED
2	Disable automatic backups	The message must display “Backup settings saved successfully”		PASSED

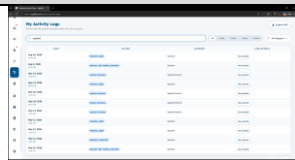

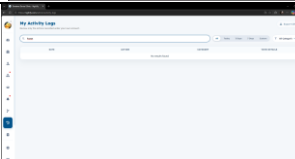

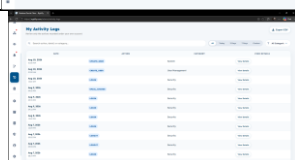

3	Backup frequency below 1 or above 168 hours	The save backup frequency must remain within the allowed range of 1 to 168 hours		PASSED
4	Number of completed backups to keep below 0 or above 90	The save retention value must remain within the allowed range of 0 to 90		PASSED
5	Save automatic backup settings and reopen Database Backup	The previously save automatic backup settings must load correctly		PASSED

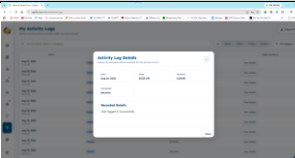

UNIT TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE		
Test Cycle No.	1	Component Name	DOWNLOAD AND VERIFY BACKUP		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login, click Database Backup from the sidebar and a completed backup record must exist				
Action Description	Download or verify the selected database backup				
Verification Steps	Select an available backup, download or verify it, and check the result				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Select a completed backup with available file and click Download	The selected backup file must be downloaded			
2	Select a completed backup with available file and click Verify Restore	The message must display “Backup verified successfully” and the verification status must display “Restore verified”			
3	Backup verification fails	The message must display “Backup verification failed” and the verification status must display “Verification failed”			
4	Selected backup file is unavailable	The Download and Verify Restore actions must not be available			

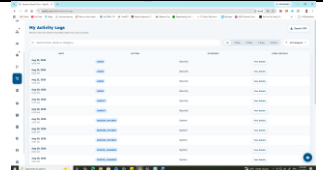

UNIT TEST DOCUMENT		Module Name	INTEGRITY TOOLS MODULE	
Test Cycle No.	1	Component Name	RUN INTEGRITY CHECKS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login, click Integrity Tools from the sidebar			
Action Description	Run all or selected system integrity checks			
Verification Steps	Run the integrity checks and verify the status and affected records			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Run integrity checks with no detected issues	The corresponding integrity checks must display <i>“Pass”</i> and <i>“No issues”</i>		PASSED
2	Run integrity check with warning-level issue	The corresponding integrity check must display <i>“Warning”</i> and the affected record/s		PASSED
3	Run integrity check with failed issue	The corresponding integrity check must display <i>“Failed”</i> and the affected record/s		
4	Run an individual integrity check	The selected integrity check result must display		PASSED
5	Network unavailable while running all integrity checks	The message must display <i>“Network error running integrity checks”</i>		PASSED

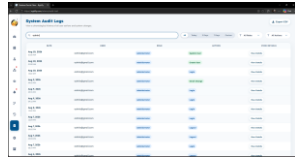

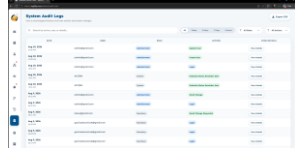

UNIT TEST DOCUMENT		Module Name	INTEGRITY TOOLS MODULE	
Test Cycle No.	1	Component Name	SAFE AUTO-FIX	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login, click Integrity Tools from the sidebar and an integrity issue eligible for Safe Auto-Fix must exist			
Action Description	Apply Safe Auto-Fix to the selected eligible integrity issue			
Verification Steps	Confirm the Safe Auto-Fix and verify that the affected record/s are updated			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Select an issue marked Safe Auto-Fix and confirm	The eligible record/s must be updated and the integrity check must run again		PASSED
2	Select an issue marked Safe Auto-Fix and cancel	The affected record/s must remain unchanged		PASSED
3	Select an issue marked Manual Review	The Auto-Fix action must not be available		PASSED
4	Safe Auto-Fix completed successfully	The message must display "Integrity issue fixed successfully"		
5	Safe Auto-Fix cannot update affected records	The message must display "Unable to apply auto-fix"		
6	Network available while applying Safe Auto-Fix	The message must display "Network error applying auto-fix"		

UNIT TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE	
--------------------	--	-------------	----------------------	--

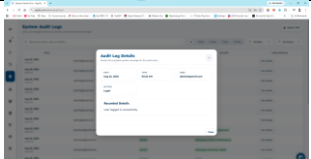

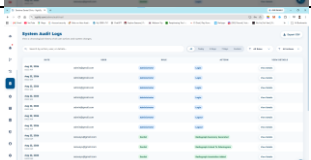

Test Cycle No.	1	Component Name	SEARCH/FILTER ACTIVITY LOGS		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click Activity Logs from the sidebar				
Action Description	Search returns matching activity logs records for valid input and no results for valid input				
Verification Steps	Verify that all activity logs matching the search criteria are displayed in the results				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Valid search by action, detail, or category	Table updates to show only the activity logs if action, detail, or category matches the search input		PASSED	
2	No match action, detail, or category	The message must display “No results found”		PASSED	
3	Empty search	The table shows records based on the configured rows per page and current page.		PASSED	

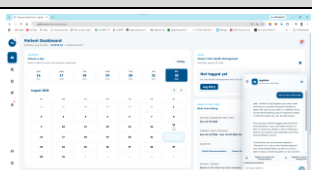

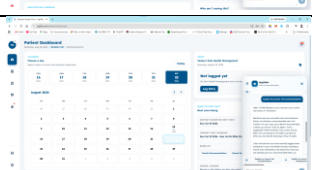

UNIT TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE	
Test Cycle No.	1	Component Name	VIEW ACTIVITY DETAILS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login, click Activity Logs from the sidebar and activity log records must exist			
Action Description	View the selected activity log details			
Verification Steps	Select an activity log and verify the complete recorded details			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Select an existing activity log and click View Details	The “Activity Log Details” modal must display the Date, Time, Action, Category, and Recorded Details		PASSED

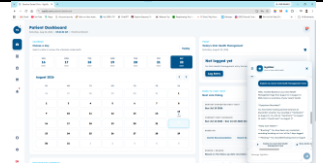

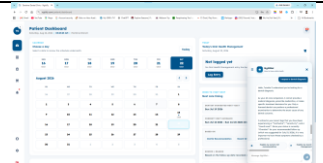

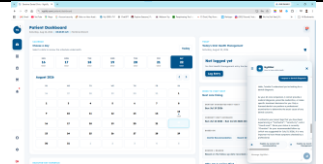

2	Close the Activity Log Details modal	The Activity Logs list must display		PASSED
---	--------------------------------------	-------------------------------------	--	--------

UNIT TEST DOCUMENT		Module Name	SYSTEM AUDIT LOGS MODULE		
Test Cycle No.	1	Component Name	SEARCH/FILTER SYSTEM AUDIT LOGS		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login in, click System Audit Logs from the sidebar				
Action Description	Search returns matching system audit logs records for valid input and no results for valid input				
Verification Steps	Verify that all system audit logs matching the search criteria are displayed in the results				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Valid search by action, detail, or category	Table updates to show only the system audit logs if action, user, role, detail, or category matches the search input		PASSED	
2	No match action, detail, or category	The message must display “No results found”		PASSED	
3	Empty search	The table shows records based on the configured rows per page and current page.		PASSED	

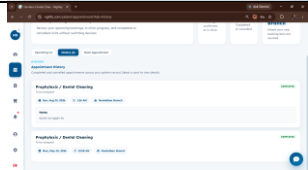

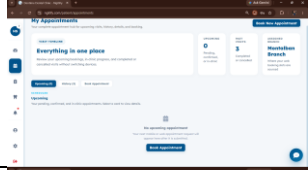

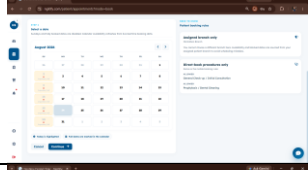

UNIT TEST DOCUMENT		Module Name	SYSTEM AUDIT LOGS MODULE		
Test Cycle No.	1	Component Name	VIEW AUDIT DETAILS		
Date Tested	08/06/2026	Type of System	Web Application		

Pre-conditions	Login, click System Audit Logs from the sidebar and system audit log records must exist			
Action Description	View the selected system audit log details			
Verification Steps	Select a system audit log and verify the complete recorded details			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Select an existing system audit log and click View Details	The "Audit Log Details" modal must display the Date, Time, User, Action, and Recorded Details		PASSED
2	Close the Audit Log Details modal	The System Audit Logs list must display		PASSED

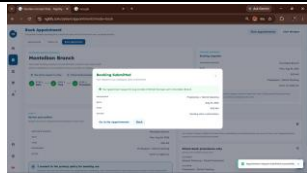

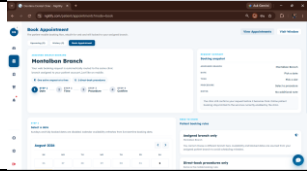

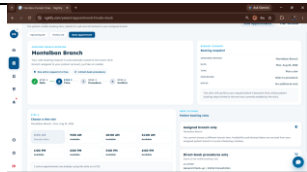

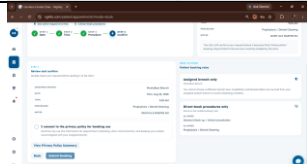

UNIT TEST DOCUMENT		Module Name	AI PATIENT ENGAGEMENT MODULE	
Test Cycle No.	1	Component Name	NGITIBOT CHAT	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient and open NgitiBot			
Action Description	Send a message or select a suggested prompt in NgitiBot			
Verification Steps	Verify that patient messages and NgitiBot explanations display in the conversation			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Enter a supported Dental Health Education question and click Send	The patient message and NgitiBot educational explanation must display in the conversation		PASSED
2	Select “Explain my current visit recommendation”	NgitiBot must explain the existing System Recommendation without replacing or overriding it		PASSED

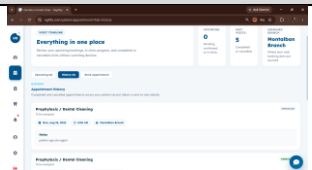

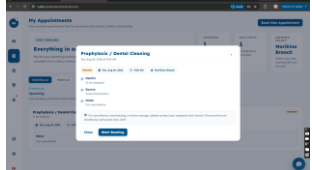

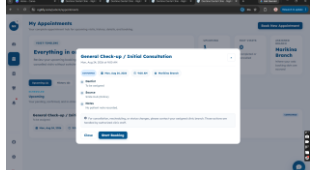

3	Select <i>“Explain my recent Oral Health Management trend”</i>	NgitiBot must explain the available Oral Health Management information without providing a diagnosis		PASSED
4	Select <i>“Explain my radiograph findings”</i> with an approved dentist finding available	NgitiBot must explain the dentist-approved radiograph findings		
5	Select <i>“Explain my radiograph findings”</i> without approved dentist findings	NgitiBot must display that no approved radiograph explanation is available		
6	Enter a request for dental diagnosis	NgitiBot must not provide a diagnosis and must recommend consulting the dentist		PASSED
7	Enter unsupported question	The message must display <i>“I can only assist with NgitiFy dental health information and available patient records.”</i>		
8	Empty message field	The Send button must be disabled		PASSED
9	Existing conversation and click Clear	The conversation must reset to the initial AI welcome message		PASSED

UNIT TEST DOCUMENT		Module Name	AI PATIENT CARE COMPANION MODULE		
Test Cycle No.	1	Component Name	NGITIBOT CARE CONTEXT		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login as Patient, open the AI Care Companion and patient care information must be available				
Action Description	View the patient’s existing care context and System Recommendation				
Verification Steps	Verify the Recommended Visit Window, Oral Health Management information, and Dental Health Education context				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Existing System Recommendation	The Recommended Visit Window, recommendation reason, and System Recommendation must display			
2	Existing Daily Oral Health Log	The recent Oral Health Management context and latest saved log must display			
3	No recent Daily Oral Health Log	The message must display “No recent Daily Oral Health Log is available yet”			
4	No supported clinic information for a visit window	The recommendation must display “Insufficient Data” and the message must display “NgitiFy does not have enough clinic information to create a visit window”			
5	No contextual Dental Health Education for recent logs	The message must display “No contextual Dental Health Education topics are currently matched to your recent logs”			
6	Existing dentist-approved radiograph finding	The radiograph explanation context must display			
7	Existing pending AI-assisted radiograph review	The pending AI-assisted review must not display			
8	No approved radiograph findings	The message must display that no radiograph explanation is currently available			

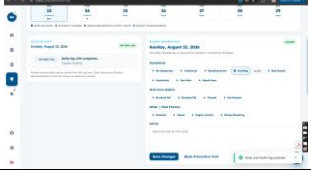

UNIT TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE	
Test Cycle No.	1	Component Name	MY APPOINTMENTS	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient and click My Appointments from the sidebar			
Action Description	View patient’s upcoming and previous appointments			
Verification Steps	Verify that the patient’s appointment records and details are displayed			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Patient has upcoming appointment	The upcoming appointment must display		PASSED
2	Patient has completed or cancelled appointment	The appointment must display in the appointment history		PASSED
3	Patient has no upcoming appointment	The message must display “No upcoming appointment”		PASSED
4	Select an existing appointment	The selected appointment details must display		PASSED
5	Patient has no completed or cancelled appointment	The message must display “No visit history yet”		PASSED

UNIT TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE	
--------------------	--	-------------	-----------------------------	--

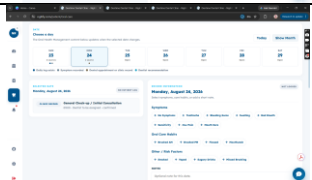

Test Cycle No.	1	Component Name	BOOK APPOINTMENT	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient, click My Appointments from the sidebar then click Book Appointment			
Action Description	The appointment information must be validated			
Verification Steps	The new appointment must be added to My Appointments			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Complete and valid required fields, the patient has no ongoing appointment, and selected date and time are available	The appointment must be submitted successfully and appear in My Appointments		PASSED
2	Empty required fields	The message must display "Required"		
3	Patient has an existing ongoing appointment	The patient must not be able to book another appointment		PASSED
4	Patient's previous appointment has Completed or Cancelled status	The patient must be able to book a new appointment		PASSED
5	Select a fully booked appointment date	The fully booked date must not be available for selection		
6	Select an appointment time already booked by another patient	The booked appointment time must not be available for selection		PASSED
7	Select an available appointment date and time	The selected appointment date and time must be available for booking		PASSED

UNIT TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE	
Test Cycle No.	1	Component Name	MANAGE APPOINTMENT	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient, click My Appointments from the sidebar then select an upcoming appointment			
Action Description	Cancel or reschedule the selected appointment based on the allowed appointment conditions			
Verification Steps	The selected appointment must be cancelled or rescheduled without creating another appointment			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Cancel an eligible Pending or Confirmed appointment with valid cancellation reason	The appointment status must display Cancelled		PASSED
2	Cancel an eligible appointment with empty cancellation reason	The appointment must not be cancelled		
3	Reschedule an eligible Pending or Confirmed appointment to an available date and time	The existing appointment must be updated with the new schedule and another appointment record must not be created		
6	Cancel or reschedule an In Clinic appointment	The cancel and reschedule actions must not be available		
7	Cancel or reschedule a Completed appointment	The cancel and reschedule actions must not be available		

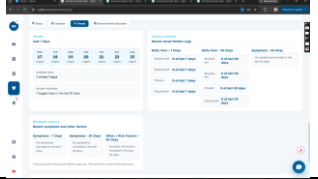

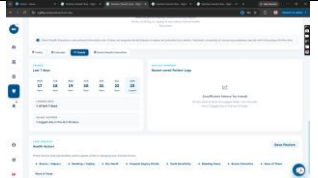

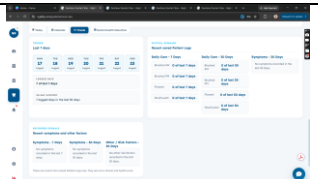

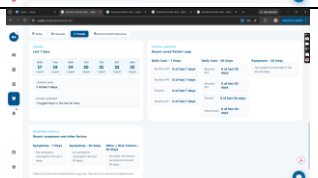

UNIT TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.	1	Component Name	DAILY ORAL HEALTH LOG
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar and select today or a previous date		

Action Description	The Daily Oral Health Log information must be validated			
Verification Steps	Select the oral health information, save the entry, and verify the saved Daily Oral Health Log			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Select any valid symptom, oral care habit, or other factor and click Save Entry	The message must display <i>"Daily oral health log saved"</i>		PASSED
2	Empty symptom, oral care, other factor, and notes	The message must display <i>"Select at least one symptom, care item, risk factor, or note before saving"</i>		PASSED
3	Select <i>"No Symptoms"</i> then select another symptom	<i>"No Symptoms"</i> and another symptom must not remain selected at the same time		PASSED
4	Select Toothache, Swelling, Jaw Pain, or Mouth Sore and enter optional Severity or Duration	The message must display <i>"Daily oral health log saved"</i>		PASSED
5	Enter a valid optional note	The message must display <i>"Daily oral health log saved"</i>		PASSED
6	Existing Daily Oral Health Log for the selected date and click Save Changes	The message must display <i>"Daily oral health log updated"</i> and another Daily Oral Health Log must not be created		PASSED

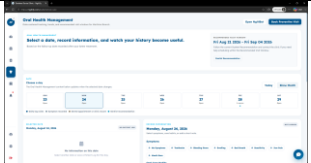

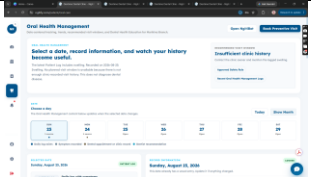

UNIT TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.	1	Component Name	ORAL HEALTH CALENDAR & HISTORY
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar and open Calendar		

Action Description	View the patient's Oral Health Management records by selected date			
Verification Steps	Select different calendar dates and verify the corresponding Oral Health Management information			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Select a date with an existing Daily Oral Health Log	The selected Daily Oral Health Log must display and the selected date must display "Patient Log"		PASSED
2	Select a date without a Patient Log, appointment, clinic record, or recommendation	The message must display "No information on this date" and "Select another date or save a log for this day"		PASSED
3	No saved Daily Oral Health Log history	The message must display "No history yet" and "Saved entries will appear here and mark the calendar"		
4	Select another date using the week selector or month calendar	The Oral Health Management information must update based on the selected date		PASSED
5	Date contains a saved Daily Oral Health Log	The corresponding Daily Log marker must display on the selected date		PASSED

UNIT TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.	1	Component Name	ORAL HEALTH TRENDS
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar and open Trends		
Action Description	View the patient's Oral Health Management trends from saved Patient Logs		
Verification Steps	Verify the calculated 7-day and 30-day trend information		

Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	At least two Daily Oral Health Logs within the last 30 days	The 7-day and 30-day Oral Health Management trend counts must display		PASSED
2	No Daily Oral Health Logs within the last 30 days	The message must display <i>"Insufficient history for trends"</i>		PASSED
3	One Daily Oral Health Log within the last 30 days	The message must display <i>"Insufficient history for trends"</i> and <i>"Trends need at least two logged dates. You currently have 0 logged days in the last 30 days"</i>		
4	At least two logs but no symptoms within the last 30 days	The message must display <i>"No symptoms recorded in the last 30 days"</i>		PASSED
5	At least two logs but no other risk factors within the last 30 days	The message must display <i>"No other risk factors recorded in the last 30 days"</i>		PASSED

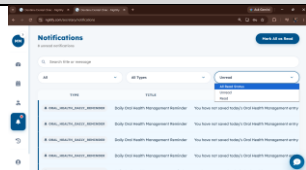

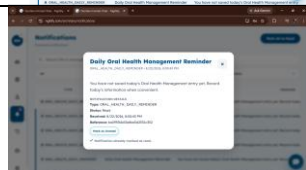

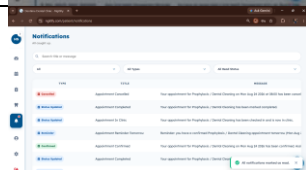

UNIT TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.	1	Component Name	RECOMMENDED VISIT WINDOW
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar and Recommended Visit Window information must be available		
Action Description	Display the patient's Recommended Visit Window based on the available clinic information and Oral Health Management rules		

Verification Steps	Verify the recommendation, source, reason, and visit timing			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Dentist Suggested Next Visit exists and no earlier-contact rule applies	The Dentist Recommendation must remain the primary planned-care recommendation		
2	Latest Daily Oral Health Log contains Swelling	The recommendation must display Contact Clinic guidance without providing a diagnosis		
3	Latest supported symptom detail has Severe severity	The recommendation must display Contact Clinic guidance without providing a diagnosis		
4	Low-concern Daily Oral Health Logs and Dentist Suggested Next Visit exists	The Dentist Recommendation must not be postponed		
5	No Dentist Suggested Next Visit and insufficient supported clinic treatment history	The recommendation must display “Insufficient Data” and an unsupported visit window must not be created		PASSED

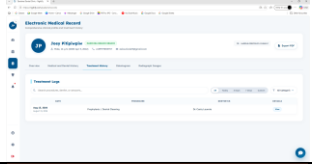

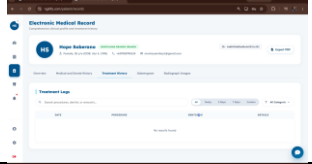

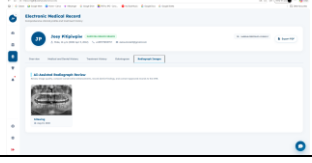

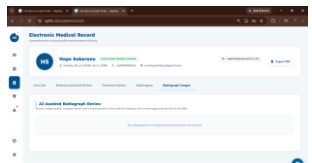

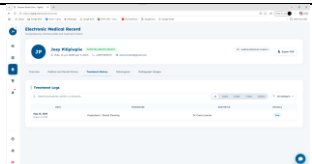

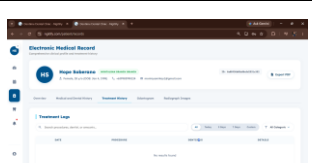

UNIT TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE	
Test Cycle No.	1	Component Name	CONTEXTUAL DENTAL HEALTH EDUCATION	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar and a Daily Oral Health Log must be available			
Action Description	Display Dental Health Education related to the recorded Oral Health Management information			
Verification Steps	Select a date with recorded information and verify the corresponding Dental Health Education topic/s			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Daily Oral Health Log contains Sensitivity	“Understanding tooth sensitivity” must display		
2	Daily Oral Health Log contains Bleeding Gums	Related Gum Care and Flossing Dental Health Education must display		

3	Daily Oral Health Log contains Missed Brushing	<i>"Build a brushing routine you can repeat"</i> must display		
4	Daily Oral Health Log contains Sugary Drinks	<i>"Sugary drinks and everyday oral care"</i> must display		
5	Daily Oral Health Log contains Smoked or Vaped	<i>"Smoking, vaping, and oral-health conversations"</i> must display		
6	Selected date has no information matching a Dental Health Education topic	The message must display <i>"No matching topic yet"</i>		

UNIT TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE	
Test Cycle No.	1	Component Name	DENTAL HEALTH EDUCATION LIBRARY	
Date Tested	08/06/2026	Type of System	Web Application	
Pre-conditions	Login as Patient, click Oral Health Management from the sidebar then open Dental Health Education			
Action Description	Search, filter, and view the Dental Health Education library			
Verification Steps	Select a category, enter a search keyword, and open an available article			
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Open Dental Health Education	The available Dental Health Education articles and categories must display		PASSED
2	Select an available Dental Health Education category	Only the Dental Health Education articles matching the selected category must display		
3	Enter a valid Dental Health Education search keyword	The matching Dental Health Education article/s must display		
4	Enter a search keyword with no matching article	no matching article The message must display “No education topics found”		
5	Select an existing Dental Health Education article	The selected article title, summary, content, and “What you can do” information must display		

UNIT TEST DOCUMENT		Module Name	PATIENT NOTIFICATIONS MODULE		
Test Cycle No.	1	Component Name	NOTIFICATION INBOX		
Date Tested	08/06/2026	Type of System	Web Application		
Pre-conditions	Login as Patient and click Notifications from the sidebar				
Action Description	View and manage the patient’s notifications				
Verification Steps	Open Notifications, select unread notifications, and verify the notification status and unread count				
Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks	
1	Patient has read and unread notifications	The notification list, unread count, and total notification count must display correctly		PASSED	
2	Select an unread notification	The selected notification must be marked as read		PASSED	
3	Click Mark All as Read	All unread notifications must be marked as read and the inbox must display “All caught up”		PASSED	

UNIT TEST DOCUMENT		Module Name	PATIENT MEDICAL RECORDS MODULE
Test Cycle No.	1	Component Name	VIEW EMR
Date Tested	08/06/2026	Type of System	Web Application
Pre-conditions	Login as Patient and click Medical Records from the sidebar		
Action Description	View the patient’s available EMR information		
Verification Steps	Navigate through Overview, Medical & Dental History, Treatment History, Odontogram, and X-Rays and verify the available records		

Test Scenario	Data (Input Values)	Expected Results	Actual Results	Remarks
1	Patient has an Overview	The Overview must display		
2	Patient has Medical & Dental History	The Medical & Dental History must display		
3	Patient has existing treatment records	The Recent Treatment History must display		PASSED
4	Patient has no treatment history	The message must display <i>"No treatment history yet"</i>		PASSED
5	Patient has an existing odontogram	The patient's odontogram must display and the patient must not be able to edit it		PASSED
6	Patient has no odontogram record	The message must display <i>"No odontogram recorded yet"</i>		PASSED
7	Patient has existing radiograph record/s	The available radiograph record/s must display		PASSED
8	Patient has no radiograph records	The message must display <i>"No radiographs yet"</i> and <i>"Radiographs uploaded by the clinic will appear here for your reference"</i>		PASSED
