

FUNCTIONALITY TEST: PATIENT - MOBILE

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE	
Test Cycle No.		Function Name	LOGIN	
		User/Access Type	Patient	
Date Tested		Type of System	Mobile Application	
Pre-Conditions	Launch the NgitiFy mobile app; an active patient account exists			
Action Description	The email and password must be validated			
Verification Steps	The dashboard must display			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to log in successfully and display the Patient dashboard.			

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Launch the NgitiFy mobile app, open the Login screen, and tap the Forgot Password link		
Action Description	The email must be validated		
Verification Steps	The verification methods page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the verification code page after the password reset request is submitted.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE	
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP	
		User/Access Type	Patient	
Date Tested		Type of System	Mobile Application	

Pre-Conditions	On the Forgot Password screen, enter the registered patient email address and request a verification code		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	On the OTP verification step, enter a valid OTP to continue to the new-password form		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Profile on the bottom navigation bar, and select Edit profile		
Action Description	The user details must be validated		
Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to save the updated profile information and display a confirmation message.		
---	--	--	--

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Profile on the bottom navigation bar, and select Change Email		
Action Description	The email and password must be validated		
Verification Steps	The email must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Profile on the bottom navigation bar, open Settings, and select Change Password		
Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the password successfully, display a confirmation message, and log out the user.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
-----------------------------	--	-------------	-------------------------

Test Cycle No.		Function Name	NOTIFICATIONS
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Profile on the bottom navigation bar, open Settings, and scroll to the Notifications section		
Action Description	The Notification preferences must be updated		
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	AI PATIENT ENGAGEMENT MODULE
Test Cycle No.		Function Name	NGITIBOT CHAT
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient and tap the floating NgitiBot button		
Action Description	Send a message or select a suggested prompt in NgitiBot		
Verification Steps	Verify that patient messages and NgitiBot explanations display in the conversation		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's message and the corresponding NgitiBot response in the conversation.		

FUNCTIONALITY TEST DOCUMENT		Module Name	AI PATIENT ENGAGEMENT MODULE
Test Cycle No.		Function Name	NGITIBOT CARE CONTEXT
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap the floating NgitiBot button, and ensure patient care information is available		
Action Description	View the patient's existing care context and System Recommendation		

Verification Steps	Verify the Recommended Visit Window, Oral Health Management information, and Dental Health Education context		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Recommended Visit Window, Oral Health Management information, and relevant Dental Health Education context.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE
Test Cycle No.		Function Name	MY APPOINTMENTS
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient and tap Visits on the bottom navigation bar		
Action Description	View patient's upcoming and previous appointments		
Verification Steps	Verify that the patient's appointment records and details are displayed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's upcoming and previous appointments with their details.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE
Test Cycle No.		Function Name	BOOK APPOINTMENT
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Visits on the bottom navigation bar, and tap Book Appointment		
Action Description	The appointment information must be validated		
Verification Steps	The new appointment must be added to My Appointments		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to book the appointment successfully and display it in My Appointments.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE
Test Cycle No.		Function Name	MANAGE APPOINTMENT
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as Patient, tap Visits on the bottom navigation bar, then select an upcoming appointment		
Action Description	Cancel or reschedule the selected appointment based on the allowed appointment conditions		
Verification Steps	The selected appointment must be cancelled or rescheduled without creating another appointment		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to cancel or reschedule the selected appointment and display the updated appointment without creating a duplicate.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE	
Test Cycle No.		Function Name	DAILY ORAL HEALTH LOG	
		User/Access Type	Patient	
Date Tested		Type of System	Mobile Application	
Pre-Conditions	Login as a patient, tap Health on the bottom navigation bar, open Today, and select today or an earlier date			
Action Description	The Daily Oral Health Log information must be validated			
Verification Steps	Select the oral health information, save the entry, and verify the saved Daily Oral Health Log			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to save the Daily Oral Health Log and display the saved information for the selected date.			

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE	
Test Cycle No.		Function Name	ORAL HEALTH CALENDAR & HISTORY	
		User/Access Type	Patient	

Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Health on the bottom navigation bar, and open Calendar		
Action Description	View the patient's Oral Health Management records by selected date		
Verification Steps	Select different calendar dates and verify the corresponding Oral Health Management information		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Oral Health Management information corresponding to the selected calendar date.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	ORAL HEALTH TRENDS
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Health on the bottom navigation bar, and open Calendar		
Action Description	View the patient's Oral Health Management trends from saved Patient Logs		
Verification Steps	Verify the calculated 7-day and 30-day trend information		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the calculated 7-day and 30-day Oral Health Management trends.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	RECOMMENDED VISIT WINDOW
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as a patient, tap Health on the bottom navigation bar, and click Predictive Visit		
Action Description	Display the patient's Recommended Visit Window based on the available clinic information and Oral Health Management rules		
Verification Steps	Verify the recommendation, source, reason, and visit timing		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must display the Recommended Visit Window with its source, reason, and visit timing.		
---	--	--	--

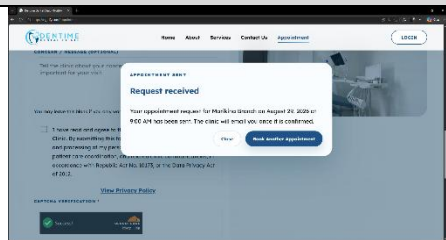

FUNCTIONALITY TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE
Test Cycle No.		Function Name	CONTEXTUAL DENTAL HEALTH EDUCATION
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as Patient, tap Health on the bottom navigation bar and click Dental Health Education		
Action Description	Display Dental Health Education related to the recorded Oral Health Management information		
Verification Steps	Select a date with recorded information and verify the corresponding Dental Health Education topic/s		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Dental Health Education topics related to the selected Oral Health Management record.		

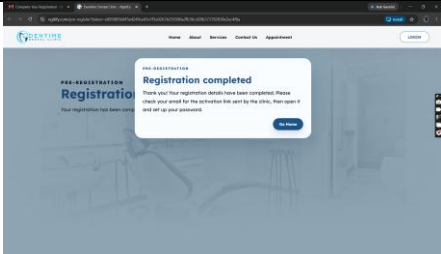

FUNCTIONALITY TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE
Test Cycle No.		Function Name	DENTAL HEALTH EDUCATION LIBRARY
		User/Access Type	Patient
Date Tested		Type of System	Mobile Application
Pre-Conditions	Login as Patient, tap Health on the bottom navigation bar and click Dental Health Education		
Action Description	Search, filter, and view the Dental Health Education library		
Verification Steps	Select a category, enter a search keyword, and open an available article		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the matching Dental Health Education articles and the selected article content.		

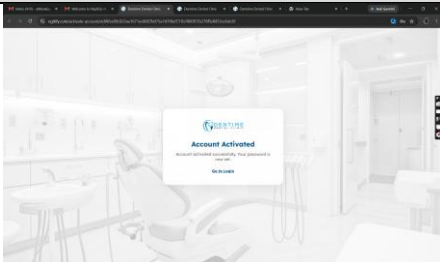

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT NOTIFICATIONS MODULE	
Test Cycle No.		Function Name	NOTIFICATION INBOX	
		User/Access Type	Patient	
Date Tested		Type of System	Mobile Application	
Pre-Conditions	Login as a patient, tap the notification bell on Home, and open Notifications			
Action Description	View and manage the patient’s notifications			
Verification Steps	Open Notifications, select unread notifications, and verify the notification status and unread count			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the patient's notifications and update the read status and unread count when a notification is opened.			

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT MEDICAL RECORDS MODULE	
Test Cycle No.		Function Name	VIEW EMR	
		User/Access Type	Patient	
Date Tested		Type of System	Mobile Application	
Pre-Conditions	Login as a patient and tap Records on the bottom navigation bar			
Action Description	View the patient’s available EMR information			
Verification Steps	Navigate through Medical & Dental History, Treatment History, Odontogram, and X-Rays and verify the available records			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the patient's available Medical and Dental History, Treatment History, Odontogram, and X-Ray records.			

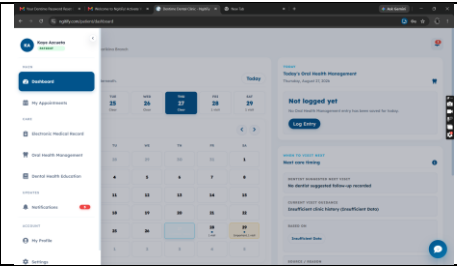

FUNCTIONALITY TESTING: PATIENT - WEB

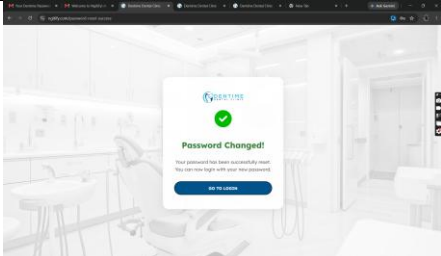

FUNCTIONALITY TEST DOCUMENT		Module Name	WEBSITE ONLINE BOOKING MODULE	
Test Cycle No.		Function Name	WEBSITE APPOINTMENT REQUEST	
		User/Access Type	Patient	
Date Tested		Type of System	Web Application	
Pre-Conditions	Appointment page is open			
Action Description	Submit online booking request			
Verification Steps	Fill form, submit, and check message/result			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to submit the appointment request successfully and display a confirmation message.			

FUNCTIONALITY TEST DOCUMENT		Module Name	REGISTRATION MODULE	
Test Cycle No.		Function Name	PATIENT PRE-REGISTRATION	
		User/Access Type	Patient	
Date Tested		Type of System	Web Application	
Pre-Conditions	Unregistered patient booked an appointment online			
Action Description	Pre-register patient form must be validated			
Verification Steps	Complete pre-registration form and check email for link verification			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to submit the pre-registration form successfully and display a confirmation that the activation link was sent.			

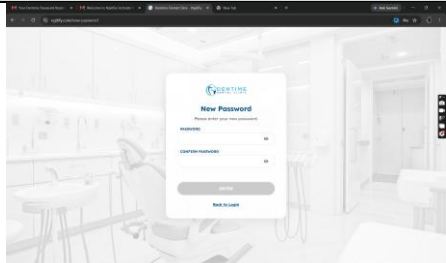

FUNCTIONALITY TEST DOCUMENT		Module Name	REGISTRATION MODULE	
Test Cycle No.		Function Name	SET-UP PASSWORD	
		User/Access Type	Patient	
Date Tested		Type of System	Web Application	
Pre-Conditions	Patient already registered			
Action Description	The password must be validated			
Verification Steps	The password must set and the login page must display			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to set up the account password successfully and display the Login page.			
2	Login page must display			

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE		
Test Cycle No.		Function Name	LOGIN		
		User/Access Type	Patient		
Date Tested		Type of System	Web Application		
Pre-Conditions	Browser opened; account exists				
Action Description	The email and password must be validated				
Verification Steps	The dashboard must display				
Test Scenario	Expected Results		Actual Results		Remarks

1	Must be able to log in successfully and display the Patient dashboard.		
---	--	--	--

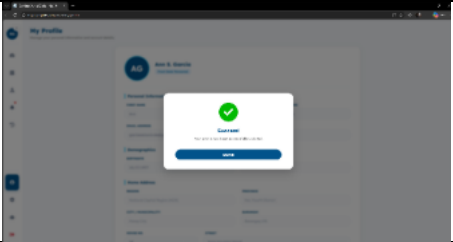

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE	
Test Cycle No.		Function Name	FORGOT PASSWORD	
		User/Access Type	Patient	
Date Tested		Type of System	Web Application	
Pre-Conditions	Click “Forgot Password” on the login page			
Action Description	The email must be validated			
Verification Steps	The verification methods page must display			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the verification code page after the password reset request is submitted.			

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Enter email in the Forgot Password page.		
Action Description	The OTP must be validated		

Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Enter the valid OTP in the OTP page.		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		
2	Login page must display		

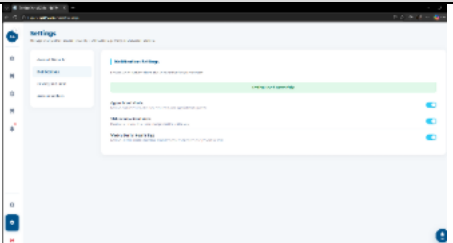

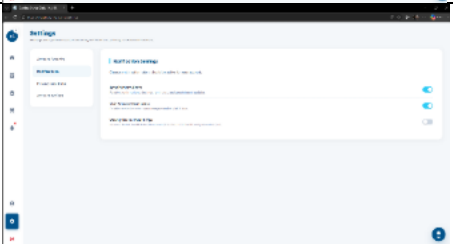

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”		

Action Description	The user details must be validated		
Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated profile information and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Change Email”		
Action Description	The email and password must be validated		
Verification Steps	The email and password must be validated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “Settings” from the sidebar and click “Account Security”		

Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the password successfully, display a confirmation message, and log out the user.		
	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	NOTIFICATIONS
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click settings from the sidebar and open Notifications		
Action Description	The Notification preferences must be updated		
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.		
2	Saved preferences remain after reopening the page		

FUNCTIONALITY TEST DOCUMENT		Module Name	AI PATIENT ENGAGEMENT MODULE	
Test Cycle No.		Function Name	NGITIBOT CHAT	
		User/Access Type	Patient	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login as Patient and open NgitiBot			
Action Description	Send a message or select a suggested prompt in NgitiBot			
Verification Steps	Verify that patient messages and NgitiBot explanations display in the conversation			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the patient's message and the corresponding NgitiBot response in the conversation.			

FUNCTIONALITY TEST DOCUMENT		Module Name	AI PATIENT CARE COMPANION MODULE
Test Cycle No.		Function Name	NGITIBOT CARE CONTEXT
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, open the AI Care Companion and patient care information must be available		
Action Description	View the patient’s existing care context and System Recommendation		
Verification Steps	Verify the Recommended Visit Window, Oral Health Management information, and Dental Health Education context		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Recommended Visit Window, Oral Health Management information, and relevant Dental Health Education context.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE	
Test Cycle No.		Function Name	MY APPOINTMENTS	

		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient and click My Appointments from the sidebar		
Action Description	View patient's upcoming and previous appointments		
Verification Steps	Verify that the patient's appointment records and details are displayed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's upcoming and previous appointments with their details.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENTS APPOINTMENTS MODULE
Test Cycle No.		Function Name	BOOK APPOINTMENT
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click My Appointments from the sidebar then click Book Appointment		
Action Description	The appointment information must be validated		
Verification Steps	The new appointment must be added to My Appointments		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to book the appointment successfully and display it in My Appointments.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT APPOINTMENTS MODULE
Test Cycle No.		Function Name	MANAGE APPOINTMENT
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click My Appointments from the sidebar then select an upcoming appointment		
Action Description	Cancel or reschedule the selected appointment based on the allowed appointment conditions		

Verification Steps	The selected appointment must be cancelled or rescheduled without creating another appointment		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to cancel or reschedule the selected appointment and display the updated appointment without creating a duplicate.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	DAILY ORAL HEALTH LOG
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar and select today or a previous date		
Action Description	The Daily Oral Health Log information must be validated		
Verification Steps	Select the oral health information, save the entry, and verify the saved Daily Oral Health Log		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the Daily Oral Health Log and display the saved information for the selected date.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	ORAL HEALTH CALENDAR & HISTORY
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar and open Calendar		
Action Description	View the patient's Oral Health Management records by selected date		
Verification Steps	Select different calendar dates and verify the corresponding Oral Health Management information		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Oral Health Management information		

	corresponding to the selected calendar date.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	ORAL HEALTH TRENDS
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar and open Trends		
Action Description	View the patient's Oral Health Management trends from saved Patient Logs		
Verification Steps	Verify the calculated 7-day and 30-day trend information		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the calculated 7-day and 30-day Oral Health Management trends.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ORAL HEALTH MANAGEMENT MODULE
Test Cycle No.		Function Name	RECOMMENDED VISIT WINDOW
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar and Recommended Visit Window information must be available		
Action Description	Display the patient's Recommended Visit Window based on the available clinic information and Oral Health Management rules		
Verification Steps	Verify the recommendation, source, reason, and visit timing		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Recommended Visit Window with its source, reason, and visit timing.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE
Test Cycle No.		Function Name	CONTEXTUAL DENTAL HEALTH EDUCATION
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar and a Daily Oral Health Log must be available		
Action Description	Display Dental Health Education related to the recorded Oral Health Management information		
Verification Steps	Select a date with recorded information and verify the corresponding Dental Health Education topic/s		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Dental Health Education topics related to the selected Oral Health Management record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DENTAL HEALTH EDUCATION MODULE
Test Cycle No.		Function Name	DENTAL HEALTH EDUCATION LIBRARY
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient, click Oral Health Management from the sidebar then open Dental Health Education		
Action Description	Search, filter, and view the Dental Health Education library		
Verification Steps	Select a category, enter a search keyword, and open an available article		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the matching Dental Health Education articles and the selected article content.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT NOTIFICATIONS MODULE
Test Cycle No.		Function Name	NOTIFICATION INBOX

		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient and click Notifications from the sidebar		
Action Description	View and manage the patient's notifications		
Verification Steps	Open Notifications, select unread notifications, and verify the notification status and unread count		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's notifications and update the read status and unread count when a notification is opened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	MY EMR MODULE
Test Cycle No.		Function Name	VIEW EMR
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient and click Medical Records from the sidebar		
Action Description	View the patient's available EMR information		
Verification Steps	Navigate through Overview, Medical & Dental History, Treatment History, Odontogram, and X-Rays and verify the available records		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's available Medical and Dental History, Treatment History, Odontogram, and X-Ray records.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	PATIENT RADIOGRAPH EXPLANATION
		User/Access Type	Patient
Date Tested		Type of System	Web Application
Pre-Conditions	Login as Patient and click Medical Records from the sidebar		

Action Description	View dentist-approved radiograph information and AI explanation		
Verification Steps	Open Radiograph Images and verify the available radiograph explanation information		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the dentist-approved radiograph information and the available AI explanation.		

FUNCTIONALITY TESTING: ADMIN - WEB

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	LOGIN
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Browser opened; account exists		
Action Description	The email and password must be validated		
Verification Steps	The dashboard must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to log in successfully and display the Admin dashboard.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Click “Forgot Password” on the login page		
Action Description	The email must be validated		
Verification Steps	The verification methods page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the verification code page after the password reset request is submitted.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP
		User/Access Type	Admin
Date Tested		Type of System	Web Application

Pre-Conditions	Enter email in the Forgot Password page.		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Enter the valid OTP in the OTP page.		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		
2	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”		
Action Description	The user details must be validated		

Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated profile information and display a confirmation message.		

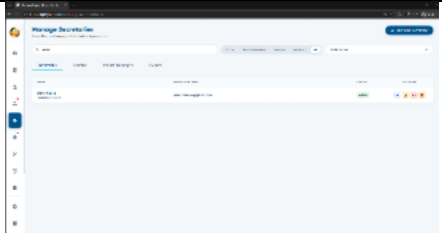

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Change Email”		
Action Description	The email and password must be validated		
Verification Steps	The email and password must be validated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

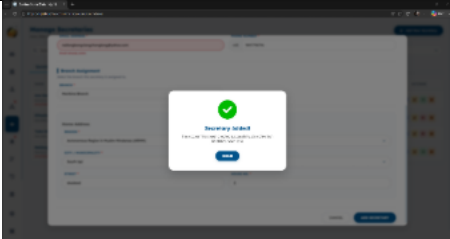

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “Settings” from the sidebar and click “Account Security”		
Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to change the password successfully, display a confirmation message, and log out the user.		
	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE	
Test Cycle No.		Function Name	NOTIFICATIONS	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login, click settings from the sidebar and open Notifications			
Action Description	The Notification preferences must be updated			
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.			

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE		
Test Cycle No.		Function Name	SEARCH/FILTER STAFF		
		User/Access Type	Admin		
Date Tested		Type of System	Web Application		
Pre-Conditions	Login in, click Manage Staffs from the sidebar				
Action Description	Search returns matching staff records for valid input and no results for invalid input				
Verification Steps	Verify that all employees matching the search criteria are display in the results				
Test Scenario	Expected Results		Actual Results		Remarks

1	Must display only the staff records matching the search criteria or display no results when no staff record matches.		
---	--	--	--

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW STAFF
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then click the Add New *Selected Staff Role Tab* button		
Action Description	The staff's information must be validated		
Verification Steps	The new staff must be added to the staffs list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new staff account successfully and display it in the staff list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT STAFF INFO
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list and click the edit button		
Action Description	The staff's information must be validated		
Verification Steps	The staff's information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to save the updated staff information and display it in the staff record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	STAFF ACCOUNT LIFECYCLE
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list		
Action Description	Activate, deactivate, archive, restore, or reissue staff account access		
Verification Steps	The staff's status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the staff member's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER PATIENT
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar		
Action Description	Search returns matching patient records for valid input and no results for invalid input		
Verification Steps	Verify that all patients matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the patients matching the search criteria or display no results when no patient matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW PATIENT
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then click the Add New Patient button		
Action Description	The patient’s information must be validated		
Verification Steps	The new patient must be added to the patients’ list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new patient successfully and display the patient in the patient list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT PATIENT
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list and click the edit button		
Action Description	The patient’s information must be validated		
Verification Steps	The patient’s information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated patient information and display it in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE	
Test Cycle No.		Function Name	PATIENT ACCOUNT LIFECYCLE	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	

Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Activate, deactivate, archive, restore, or send patient access email		
Verification Steps	The patient's account status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the patient's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	PATIENT BRANCH TRANSFER
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Transfer patient to another branch		
Verification Steps	The patient's branch assignment must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to transfer the patient and display the updated branch assignment.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD BRANCH
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then click Add Branch button		
Action Description	The new branch information must be validated		
Verification Steps	The new branch must be added to the branches' list		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new branch successfully and display it in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT BRANCH
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then select a branch and click the edit button		
Action Description	The branch information must be validated		
Verification Steps	The branch information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated branch information and display it in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	BRANCH STATUS
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then select a branch		
Action Description	Activate or deactivate a branch		
Verification Steps	The branch status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the branch status and display the updated status in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE	
Test Cycle No.		Function Name	BRANCH ANALYTICS	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Branches from the sidebar then select a branch and click view button			
Action Description	View branch analytics			
Verification Steps	The branch analytics must display			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the branch analytics and the corresponding branch data.			

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.		Function Name	SEARCH/FILTER SCHEDULE	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Schedule from the sidebar			
Action Description	Search returns matching schedule records for valid input and no results for invalid input			
Verification Steps	Verify that all schedule matching the search criteria are displayed in the results			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display only the schedules matching the search criteria or display no results when no schedule matches.			

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.		Function Name	ADD SCHEDULE	
		User/Access Type	Admin	

Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then click Add Schedule Entry button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be added to the schedule list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new schedule successfully and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT SCHEDULE/RESCHEDULE
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule entry and click the edit button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated schedule and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	SCHEDULE STATUS MANAGEMENT
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule from the list		
Action Description	Update appointment status		
Verification Steps	The appointment status must be updated		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the appointment status and display the updated status in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	MEDICAL AND DENTAL HISTORY
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Medical & Dental History		
Action Description	Update patient's medical & dental history		
Verification Steps	The patient's medical & dental history must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated medical and dental history and display the saved information in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	TREATMENT HISTORY
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Treatment History		
Action Description	View treatment logs		
Verification Steps	The patient's treatment log must be viewed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's available treatment history and treatment details.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.		Function Name	ODONTOGRAM	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Odontogram			
Action Description	View digital odontogram			
Verification Steps	The patient’s digital odontogram must be viewed			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the patient's digital odontogram and the available tooth conditions and treatments.			

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.		Function Name	RADIOGRAPH	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Radiograph			
Action Description	View radiograph			
Verification Steps	The patient’s radiograph must be viewed			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display the patient's available radiograph images and details.			

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE	
Test Cycle No.		Function Name	SEARCH/FILTER INVENTORY	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	

Pre-Conditions	Login in, click Inventory from the sidebar		
Action Description	Search/filter returns matching inventory records for valid input and no results for invalid input		
Verification Steps	Verify that all inventory matching the search and filter criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the inventory records matching the search and filter criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW INVENTORY ITEM
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click Add New Item button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item must be added to the inventory list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new inventory item successfully and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD INVENTORY STOCK
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and choose Add Stock/Receive Stock		
Action Description	The new stock batch information must be validated		
Verification Steps	The new stock batch must be added to the batch list		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new stock batch successfully and display it in the batch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT INVENTORY ITEM
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click the edit button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated inventory item information and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	DELETE STOCK BATCH
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar, select a stock and click the delete button		
Action Description	Delete a selected inventory stock batch		
Verification Steps	The inventory stock batch must be removed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to delete the selected stock batch and remove it from the batch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SYSTEM CONFIGURATION MODULE	
Test Cycle No.		Function Name	UPDATE SYSTEM CONFIGURATION	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click System Configuration from the side bar			
Action Description	Validate and save global system configuration settings			
Verification Steps	The system configuration settings must be updated			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to save the system configuration and display the updated settings.			

FUNCTIONALITY TEST DOCUMENT		Module Name	SYSTEM CONFIGURATION MODULE	
Test Cycle No.		Function Name	WEBSITE CONTENT & MEDIA	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login, click System Configuration from the sidebar then navigate to Website Content			
Action Description	The website content and media must be validated			
Verification Steps	Update the website content or media, save the changes, and verify the updated information			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to save the website content or media and display the updated information on the website.			

FUNCTIONALITY TEST DOCUMENT		Module Name	ARCHIVE REVIEW MODULE	
Test Cycle No.		Function Name	SEARCH/FILTER ARCHIVE RECORDS	

		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Archive Review from the sidebar		
Action Description	Search/filter returns matching archived records for valid input and no results for invalid input		
Verification Steps	Verify that all archived records matching the search and filter criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the archived records matching the search and filter criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ARCHIVE REVIEW MODULE
Test Cycle No.		Function Name	RESTORE/PERMANENT DELETE REVIEW
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Archive Review from the sidebar and archived records must exist		
Action Description	Restore or permanently delete an archived record		
Verification Steps	The archived record's state must be restored/deleted		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to restore or permanently delete the selected archived record and display the updated archive state.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE
Test Cycle No.		Function Name	BACKUP STATUS AND HISTORY
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Database Backup from the sidebar		

Action Description	View the database backup status and history		
Verification Steps	Verify the backup status, history, file availability, and verification result		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the backup status, backup history, file availability, and verification result.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE
Test Cycle No.		Function Name	CREATE DATABASE BACKUP
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Database Backup from the sidebar and click Create Backup Now button		
Action Description	Create a manual database backup		
Verification Steps	Verify the progress/result and backup history		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to create the database backup and display its result in the backup history.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE
Test Cycle No.		Function Name	AUTOMATIC BACKUP SETTINGS
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Database Backup from the sidebar and navigate to Automatic Backup Settings		
Action Description	The automatic backup settings must be validated		
Verification Steps	Enable or disable automatic backup, update the schedule settings, save, and verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the automatic backup settings and display the		

	saved settings when the page is reopened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	DATABASE BACKUP MODULE
Test Cycle No.		Function Name	DOWNLOAD AND VERIFY BACKUP
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Database Backup from the sidebar and a completed backup record must exist		
Action Description	Download or verify the selected database backup		
Verification Steps	Select an available backup, download or verify it, and check the result		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to download or verify the selected backup and display the corresponding result.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INTEGRITY TOOLS MODULE
Test Cycle No.		Function Name	RUN INTEGRITY CHECKS
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Integrity Tools from the sidebar		
Action Description	Run all or selected system integrity checks		
Verification Steps	Run the integrity checks and verify the status and affected records		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the status and affected records for each completed integrity check.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INTEGRITY TOOLS MODULE
Test Cycle No.		Function Name	SAFE AUTO-FIX
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Integrity Tools from the sidebar and an integrity issue eligible for Safe Auto-Fix must exist		
Action Description	Apply Safe Auto-Fix to the selected eligible integrity issue		
Verification Steps	Confirm the Safe Auto-Fix and verify that the affected record/s are updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to apply the Safe Auto-Fix and display the updated affected records.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE	
Test Cycle No.		Function Name	SEARCH/FILTER ACTIVITY LOGS	
		User/Access Type	Admin	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Activity Logs from the sidebar			
Action Description	Search returns matching activity logs records for valid input and no results for valid input			
Verification Steps	Verify that all activity logs matching the search criteria are displayed in the results			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display only the activity logs matching the search criteria or display no results when no record matches.			

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE	
Test Cycle No.		Function Name	VIEW ACTIVITY DETAILS	
		User/Access Type	Admin	

Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Activity Logs from the sidebar and activity log records must exist		
Action Description	View the selected activity log details		
Verification Steps	Select an activity log and verify the complete recorded details		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the complete details of the selected activity log.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SYSTEM AUDIT LOGS MODULE
Test Cycle No.		Function Name	SEARCH/FILTER SYSTEM AUDIT LOGS
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click System Audit Logs from the sidebar		
Action Description	Search returns matching system audit logs records for valid input and no results for valid input		
Verification Steps	Verify that all system audit logs matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the system audit logs matching the search criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SYSTEM AUDIT LOGS MODULE
Test Cycle No.		Function Name	VIEW AUDIT DETAILS
		User/Access Type	Admin
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click System Audit Logs from the sidebar and system audit log records must exist		
Action Description	View the selected system audit log details		

Verification Steps	Select a system audit log and verify the complete recorded details		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the complete details of the selected system audit log.		

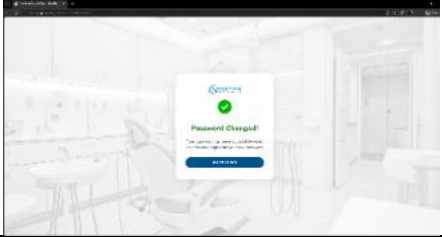

FUNCTIONALITY TESTING: OWNER - WEB

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	LOGIN
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Browser opened; account exists		
Action Description	The email and password must be validated		
Verification Steps	The dashboard must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to log in successfully and display the Owner dashboard.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Click “Forgot Password” on the login page		
Action Description	The email must be validated		
Verification Steps	The verification methods page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the verification code page after the password reset request is submitted.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP
		User/Access Type	Owner
Date Tested		Type of System	Web Application

Pre-Conditions	Enter email in the Forgot Password page.		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

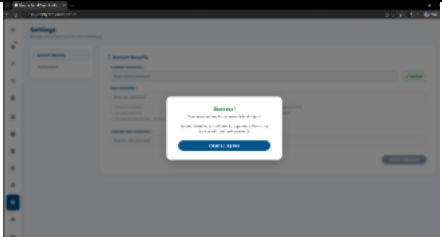

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Enter the valid OTP in the OTP page.		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		
2	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”		
Action Description	The user details must be validated		

Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated profile information and display a confirmation message.		

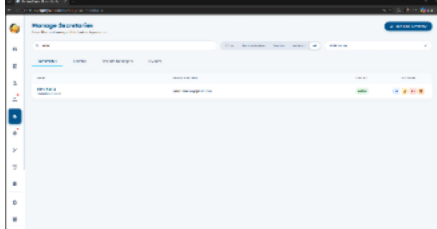

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Change Email”		
Action Description	The email and password must be validated		
Verification Steps	The email and password must be validated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

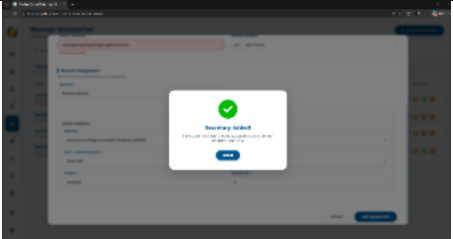

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “Settings” from the sidebar and click “Account Security”		
Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to change the password successfully, display a confirmation message, and log out the user.		
	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	NOTIFICATIONS
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click settings from the sidebar and open Notifications		
Action Description	The Notification preferences must be updated		
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER STAFF
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar		
Action Description	Search returns matching staff records for valid input and no results for invalid input		
Verification Steps	Verify that all employees matching the search criteria are display in the results		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must display only the staff records matching the search criteria or display no results when no staff record matches.		
---	--	--	--

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW STAFF
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then click the Add New *Selected Staff Role Tab* button		
Action Description	The staff's information must be validated		
Verification Steps	The new staff must be added to the staffs list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new staff account successfully and display it in the staff list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT STAFF INFO
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list and click the edit button		
Action Description	The staff's information must be validated		
Verification Steps	The staff's information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to save the updated staff information and display it in the staff record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	STAFF ACCOUNT LIFECYCLE
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list		
Action Description	Activate, deactivate, archive, restore, or reissue staff account access		
Verification Steps	The staff's status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the staff member's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER PATIENT
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar		
Action Description	Search returns matching patient records for valid input and no results for invalid input		
Verification Steps	Verify that all patients matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the patients matching the search criteria or display no results when no patient matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW PATIENT
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then click the Add New Patient button		
Action Description	The patient’s information must be validated		
Verification Steps	The new patient must be added to the patients’ list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new patient successfully and display the patient in the patient list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT PATIENT
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list and click the edit button		
Action Description	The patient’s information must be validated		
Verification Steps	The patient’s information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated patient information and display it in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE	
Test Cycle No.		Function Name	PATIENT ACCOUNT LIFECYCLE	
		User/Access Type	Owner	
Date Tested		Type of System	Web Application	

Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Activate, deactivate, archive, restore, or send patient access email		
Verification Steps	The patient's account status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the patient's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	PATIENT BRANCH TRANSFER
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Transfer patient to another branch		
Verification Steps	The patient's branch assignment must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to transfer the patient and display the updated branch assignment.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD BRANCH
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then click Add Branch button		
Action Description	The new branch information must be validated		
Verification Steps	The new branch must be added to the branches' list		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new branch successfully and display it in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT BRANCH
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then select a branch and click the edit button		
Action Description	The branch information must be validated		
Verification Steps	The branch information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated branch information and display it in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE
Test Cycle No.		Function Name	BRANCH STATUS
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Branches from the sidebar then select a branch		
Action Description	Activate or deactivate a branch		
Verification Steps	The branch status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the branch status and display the updated status in the branch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	BRANCH MANAGEMENT MODULE		
Test Cycle No.		Function Name	BRANCH ANALYTICS		
		User/Access Type	Owner		
Date Tested		Type of System	Web Application		
Pre-Conditions	Login in, click Branches from the sidebar then select a branch and click view button				
Action Description	View branch analytics				
Verification Steps	The branch analytics must display				
Test Scenario	Expected Results		Actual Results		Remarks
1	Must display the branch analytics and the corresponding branch data.				

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.		Function Name	SEARCH/FILTER SCHEDULE	
		User/Access Type	Owner	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Schedule from the sidebar			
Action Description	Search returns matching schedule records for valid input and no results for invalid input			
Verification Steps	Verify that all schedule matching the search criteria are displayed in the results			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must display only the schedules matching the search criteria or display no results when no schedule matches.			

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE	
Test Cycle No.		Function Name	ADD SCHEDULE	
		User/Access Type	Owner	

Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then click Add Schedule Entry button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be added to the schedule list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new schedule successfully and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT SCHEDULE/RESCHEDULE
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule entry and click the edit button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated schedule and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	SCHEDULE STATUS MANAGEMENT
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule from the list		
Action Description	Update appointment status		
Verification Steps	The appointment status must be updated		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the appointment status and display the updated status in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	MEDICAL AND DENTAL HISTORY
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Medical & Dental History		
Action Description	Update patient's medical & dental history		
Verification Steps	The patient's medical & dental history must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated medical and dental history and display the saved information in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	TREATMENT LOGS
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to treatment logs		
Action Description	Add or delete treatment logs		
Verification Steps	The patient's treatment log must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add or delete a treatment log and display the updated treatment log list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	INTERACTIVE DIGITAL ODONTOGRAM
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to digital odontogram		
Action Description	Manage digital odontogram		
Verification Steps	The patient's digital odontogram must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the digital odontogram and display the saved tooth conditions and treatments.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	AI-ASSISTED RADIOGRAPH REVIEW
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Manage Patients from the sidebar then select patient from the list, click View button, and navigate to Radiograph Images		
Action Description	Upload, review, verify, and manage patient's radiograph images with AI-assisted review		
Verification Steps	Upload radiograph image, review AI-assisted findings, verify dentist actions, and check patient radiograph availability		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the uploaded radiograph, AI-assisted findings, dentist verification status, and patient availability status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER INVENTORY

		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar		
Action Description	Search/filter returns matching inventory records for valid input and no results for invalid input		
Verification Steps	Verify that all inventory matching the search and filter criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the inventory records matching the search and filter criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW INVENTORY ITEM
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click Add New Item button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item must be added to the inventory list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new inventory item successfully and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD INVENTORY STOCK
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and choose Add Stock/Receive Stock		

Action Description	The new stock batch information must be validated		
Verification Steps	The new stock batch must be added to the batch list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new stock batch successfully and display it in the batch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT INVENTORY ITEM
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click the edit button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated inventory item information and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	DELETE STOCK BATCH
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar, select a stock and click the delete button		
Action Description	Delete a selected inventory stock batch		
Verification Steps	The inventory stock batch must be removed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to delete the selected stock batch and remove it from the batch list.		

--	--	--	--

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	MATERIAL USAGE LOG
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Material Usage Log from the side bar then click Log New Entry button		
Action Description	Log materials used for a completed appointment		
Verification Steps	The logged materials must be added to the list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the material usage entry and display it in the material usage list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE
Test Cycle No.		Function Name	SEARCH/FILTER ACTIVITY LOGS
		User/Access Type	Owner
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Activity Logs from the sidebar		
Action Description	Search returns matching activity logs records for valid input and no results for valid input		
Verification Steps	Verify that all activity logs matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the activity logs matching the search criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE
-----------------------------	--	-------------	----------------------

Test Cycle No.		Function Name	VIEW ACTIVITY DETAILS	
		User/Access Type	Owner	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login, click Activity Logs from the sidebar and activity log records must exist			
Action Description	View the selected activity log details			
Verification Steps	Select an activity log and verify the complete recorded details			
Test Scenario	Expected Results		Actual Results	Remarks
1	Must display the complete details of the selected activity log.			

FUNCTIONALITY TESTING: BRANCH MANAGER - WEB

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	LOGIN
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Browser opened; account exists		
Action Description	The email and password must be validated		
Verification Steps	The dashboard must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to log in successfully and display the Branch Manager dashboard.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Click “Forgot Password” on the login page		
Action Description	The email must be validated		
Verification Steps	The verification methods page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the verification code page after the password reset request is submitted.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application

Pre-Conditions	Enter email in the Forgot Password page.		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Enter the valid OTP in the OTP page.		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		
2	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”		
Action Description	The user details must be validated		

Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated profile information and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “ <i>My Profile</i> ” from the sidebar and click “ <i>Change Email</i> ”		
Action Description	The email and password must be validated		
Verification Steps	The email and password must be validated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “ <i>Settings</i> ” from the sidebar and click “ <i>Account Security</i> ”		
Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to change the password successfully, display a confirmation message, and log out the user.		
	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	NOTIFICATIONS
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click settings from the sidebar and open Notifications		
Action Description	The Notification preferences must be updated		
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE		
Test Cycle No.		Function Name	SEARCH/FILTER STAFF		
		User/Access Type	Branch Manager		
Date Tested		Type of System	Web Application		
Pre-Conditions	Login in, click Manage Staffs from the sidebar				
Action Description	Search returns matching staff records for valid input and no results for invalid input				
Verification Steps	Verify that all employees matching the search criteria are display in the results				
Test Scenario	Expected Results		Actual Results		Remarks

1	Must display only the staff records matching the search criteria or display no results when no staff record matches.		
---	--	--	--

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW STAFF
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then click the Add New *Selected Staff Role Tab* button		
Action Description	The staff's information must be validated		
Verification Steps	The new staff must be added to the staffs list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new staff account successfully and display it in the staff list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT STAFF INFO
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list and click the edit button		
Action Description	The staff's information must be validated		
Verification Steps	The staff's information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to save the updated staff information and display it in the staff record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	STAFF ACCOUNT LIFECYCLE
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Staffs from the sidebar then select a staff from the list		
Action Description	Activate, deactivate, archive, restore, or reissue staff account access		
Verification Steps	The staff's status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the staff member's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER PATIENT
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar		
Action Description	Search returns matching patient records for valid input and no results for invalid input		
Verification Steps	Verify that all patients matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the patients matching the search criteria or display no results when no patient matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE	
Test Cycle No.		Function Name	ADD NEW PATIENT	
		User/Access Type	Branch Manager	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Manage Patients from the sidebar then click the Add New Patient button			
Action Description	The patient’s information must be validated			
Verification Steps	The new patient must be added to the patients’ list			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to add a new patient successfully and display the patient in the patient list.			

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE	
Test Cycle No.		Function Name	EDIT PATIENT	
		User/Access Type	Branch Manager	
Date Tested		Type of System	Web Application	
Pre- Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list and click the edit button			
Action Description	The patient’s information must be validated			
Verification Steps	The patient’s information must be updated			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to save the updated patient information and display it in the patient record.			

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE	
Test Cycle No.		Function Name	PATIENT ACCOUNT LIFECYCLE	
		User/Access Type	Branch Manager	
Date Tested		Type of System	Web Application	

Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Activate, deactivate, archive, restore, or send patient access email		
Verification Steps	The patient's account status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to complete the selected account action and display the patient's updated account status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	USER ACCOUNTS MANAGEMENT MODULE
Test Cycle No.		Function Name	PATIENT BRANCH TRANSFER
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the sidebar then select a patient from the list		
Action Description	Transfer patient to another branch		
Verification Steps	The patient's branch assignment must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to transfer the patient and display the updated branch assignment.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER SCHEDULE
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar		
Action Description	Search returns matching schedule records for valid input and no results for invalid input		
Verification Steps	Verify that all schedule matching the search criteria are displayed in the results		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the schedules matching the search criteria or display no results when no schedule matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD SCHEDULE
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then click Add Schedule Entry button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be added to the schedule list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new schedule successfully and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT SCHEDULE/RESCHEDULE
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule entry and click the edit button		
Action Description	The schedule information must be valid		
Verification Steps	The schedule must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated schedule and display it in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	SCHEDULE STATUS MANAGEMENT
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar then select a schedule from the list		
Action Description	Update appointment status		
Verification Steps	The appointment status must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to update the appointment status and display the updated status in the schedule list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	MEDICAL AND DENTAL HISTORY
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Medical & Dental History		
Action Description	Update patient's medical & dental history		
Verification Steps	The patient's medical & dental history must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated medical and dental history and display the saved information in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	TREATMENT HISTORY
		User/Access Type	Branch Manager

Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Treatment History		
Action Description	View treatment logs		
Verification Steps	The patient's treatment log must be viewed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's available treatment history and treatment details.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	ODONTOGRAM
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Odontogram		
Action Description	View digital odontogram		
Verification Steps	The patient's digital odontogram must be viewed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's digital odontogram and the available tooth conditions and treatments.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	RADIOGRAPH
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Radiograph		
Action Description	View radiograph		
Verification Steps	The patient's radiograph must be viewed		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the patient's available radiograph images and details.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER INVENTORY
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar		
Action Description	Search/filter returns matching inventory records for valid input and no results for invalid input		
Verification Steps	Verify that all inventory matching the search and filter criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the inventory records matching the search and filter criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD NEW INVENTORY ITEM
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click Add New Item button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item must be added to the inventory list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new inventory item successfully and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	ADD INVENTORY STOCK
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and choose Add Stock/Receive Stock		
Action Description	The new stock batch information must be validated		
Verification Steps	The new stock batch must be added to the batch list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to add a new stock batch successfully and display it in the batch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	EDIT INVENTORY ITEM
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Inventory from the sidebar and click the edit button		
Action Description	The inventory item information must be validated		
Verification Steps	The inventory item information must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated inventory item information and display it in the inventory list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	DELETE STOCK BATCH
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application

Pre-Conditions	Login in, click Inventory from the sidebar, select a stock and click the delete button		
Action Description	Delete a selected inventory stock batch		
Verification Steps	The inventory stock batch must be removed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to delete the selected stock batch and remove it from the batch list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE
Test Cycle No.		Function Name	SEARCH/FILTER ACTIVITY LOGS
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Activity Logs from the sidebar		
Action Description	Search returns matching activity logs records for valid input and no results for valid input		
Verification Steps	Verify that all activity logs matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the activity logs matching the search criteria or display no results when no record matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE
Test Cycle No.		Function Name	VIEW ACTIVITY DETAILS
		User/Access Type	Branch Manager
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Activity Logs from the sidebar and activity log records must exist		
Action Description	View the selected activity log details		
Verification Steps	Select an activity log and verify the complete recorded details		

Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the complete details of the selected activity log.		

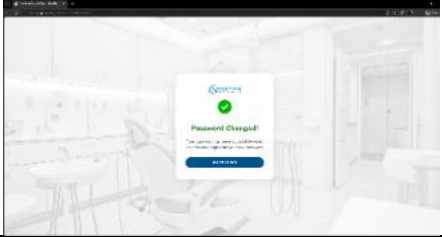

FUNCTIONALITY TESTING: DENTIST - WEB

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	LOGIN
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Browser opened; account exists		
Action Description	The email and password must be validated		
Verification Steps	The dashboard must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to log in successfully and display the Dentist dashboard.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Click “Forgot Password” on the login page		
Action Description	The email must be validated		
Verification Steps	The verification methods page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the verification code page after the password reset request is submitted.		

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	FORGOT PASSWORD - OTP
		User/Access Type	Dentist
Date Tested		Type of System	Web Application

Pre-Conditions	Enter email in the Forgot Password page.		
Action Description	The OTP must be validated		
Verification Steps	The reset password page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the Reset Password page after the correct OTP is verified.		

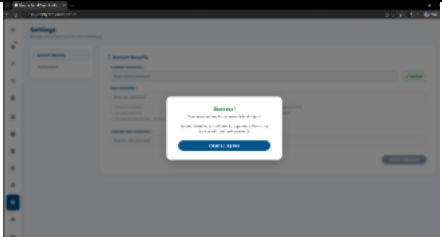

FUNCTIONALITY TEST DOCUMENT		Module Name	LOGIN MODULE
Test Cycle No.		Function Name	RESET PASSWORD
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Enter the valid OTP in the OTP page.		
Action Description	The new and confirm new password must be validated		
Verification Steps	The password must be reset and the login page must display		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to reset the password successfully and display the Login page.		
2	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	EDIT PROFILE
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Edit Profile”		
Action Description	The user details must be validated		

Verification Steps	The user details must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated profile information and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE EMAIL
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “My Profile” from the sidebar and click “Change Email”		
Action Description	The email and password must be validated		
Verification Steps	The email and password must be validated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to change the email address successfully and display a confirmation message.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	CHANGE PASSWORD
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click the “Settings” from the sidebar and click “Account Security”		
Action Description	The current password, new password, and confirm new password must be validated		
Verification Steps	The password must be updated		
Test Scenario	Expected Results	Actual Results	Remarks

1	Must be able to change the password successfully, display a confirmation message, and log out the user.		
	Login page must display		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACCOUNT SETTINGS MODULE
Test Cycle No.		Function Name	NOTIFICATIONS
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click settings from the sidebar and open Notifications		
Action Description	The Notification preferences must be updated		
Verification Steps	Enable or disable notification preferences, save the settings, and reopen the page to verify persistence		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the notification preferences and display the saved settings when the page is reopened.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	SEARCH/FILTER SCHEDULE
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar		
Action Description	Search returns matching schedule records for valid input and no results for invalid input		
Verification Steps	Verify that all schedule matching the search criteria are displayed in the results		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display only the schedules matching the search criteria or		

	display no results when no schedule matches.		

FUNCTIONALITY TEST DOCUMENT		Module Name	SCHEDULE MANAGEMENT MODULE
Test Cycle No.		Function Name	VIEW SCHEDULE
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Schedule from the sidebar and select a patient, then click View button		
Action Description	The schedule information must be displayed		
Verification Steps	The schedule information of the selected patient must be displayed		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the selected patient's complete schedule information.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	MEDICAL AND DENTAL HISTORY
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to Medical & Dental History		
Action Description	Update patient's medical & dental history		
Verification Steps	The patient's medical & dental history must be updated		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the updated medical and dental history and display the saved information in the patient record.		

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
-----------------------------	--	-------------	--------------------

Test Cycle No.		Function Name	TREATMENT LOGS	
		User/Access Type	Dentist	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login in, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to treatment logs			
Action Description	Add or delete treatment logs			
Verification Steps	The patient’s treatment log must be updated			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to add or delete a treatment log and display the updated treatment log list.			

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE	
Test Cycle No.		Function Name	INTERACTIVE DIGITAL ODONTOGRAM	
		User/Access Type	Dentist	
Date Tested		Type of System	Web Application	
Pre-Conditions	Login, click Manage Patients from the side bar then select patient from the list, click View button, and navigate to digital odontogram			
Action Description	Manage digital odontogram			
Verification Steps	The patient’s digital odontogram must be updated			
Test Scenario	Expected Results	Actual Results		Remarks
1	Must be able to update the digital odontogram and display the saved tooth conditions and treatments.			

FUNCTIONALITY TEST DOCUMENT		Module Name	PATIENT EMR MODULE
Test Cycle No.		Function Name	AI-ASSISTED RADIOGRAPH REVIEW
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login, click Manage Patients from the sidebar then select patient from the list, click View button, and navigate to Radiograph Images		

Action Description	Upload, review, verify, and manage patient's radiograph images with AI-assisted review		
Verification Steps	Upload radiograph image, review AI-assisted findings, verify dentist actions, and check patient radiograph availability		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must display the uploaded radiograph, AI-assisted findings, dentist verification status, and patient availability status.		

FUNCTIONALITY TEST DOCUMENT		Module Name	INVENTORY MANAGEMENT MODULE
Test Cycle No.		Function Name	MATERIAL USAGE LOG
		User/Access Type	Dentist
Date Tested		Type of System	Web Application
Pre-Conditions	Login in, click Material Usage Log from the side bar then click Log New Entry button		
Action Description	Log materials used for a completed appointment		
Verification Steps	The logged materials must be added to the list		
Test Scenario	Expected Results	Actual Results	Remarks
1	Must be able to save the material usage entry and display it in the material usage list.		

FUNCTIONALITY TEST DOCUMENT		Module Name	ACTIVITY LOGS MODULE
Test Cycle No.		Function Name	SEARCH/FILTER ACTIVITY LOGS
		User/Access Type	Dentist
