

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Admin		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Add Patient	Click Add Patient and submit blank, malformed, or duplicate identity and contact data.		Required, format, and possible- duplicate messages display and no duplicate patient is created.		
Add Patient	Complete identity, contact, medical or dental, and consent steps using Continue and Back.		Each step retains valid entered data, prevents invalid progression, and displays the appropriate consent information.		
Add Patient Modal	Click Cancel or close before completion.		The form closes and no patient record is created.		
Add Patient	Submit a complete valid patient record and confirm required consent.		One patient record is created, a success state displays, and the patient appears in authorized lists.		
Duplicate Patient	Choose Open Existing Record after a possible duplicate is found.		The existing patient's authorized detail view opens and no additional patient is created.		

Patient Details	Click View on a patient and then Close or Back.	The selected patient's authorized details display; Close or Back returns to the same filtered list.		
Edit Patient	Save valid non-clinical patient changes.	The existing patient updates once and the new information persists in staff and patient profile views as permitted.		
Edit Patient	Enter invalid values or click Cancel.	Validation prevents invalid saving; Cancel preserves the original patient record.		
Patient Lifecycle Modal	Choose Activate, Deactivate, Archive, or Restore and click Cancel.	The modal closes and the patient's lifecycle status and access remain unchanged.		
Patient Lifecycle Modal	Provide the required reason and click Confirm.	The permitted lifecycle change completes, list placement and account access update, and the action is logged.		
Transfer Patient Branch	Open Transfer Branch and review the target branch, upcoming appointments, and Impact Preview.	The modal accurately identifies records affected by the proposed transfer before any change occurs.		

Transfer Patient Branch Modal	Select a target branch and click Cancel.	The modal closes and the patient's branch and appointments remain unchanged.		
Transfer Patient Branch Modal	Select an allowed target branch, provide a reason, and click Confirm Transfer.	The patient moves once to the target branch, related appointments follow the confirmed handling, and one audit entry is created.		
Inventory Management	Open Inventory and search, filter, or review stock and batch history.	Authorized inventory rows, quantities, expiry or low-stock states, and expanded batch history display accurately.		
Inventory Management	Click Export CSV and Export PDF.	The current authorized inventory data downloads in the selected format.		
Add Inventory Item	Submit missing, invalid, or duplicate item information.	Validation displays and no inventory item or batch is created.		
Add Inventory Item Modal	Enter item or batch details and click Cancel.	The modal closes and inventory remains unchanged.		
Add Inventory Item Modal	Submit valid item and initial batch information.	One item and valid batch are created, totals recalculate, and a success state displays.		

Receive Stock	Add a valid new batch to an existing inventory item.	The batch appears in history and the item's available quantity and status recalculate.		
Edit Inventory	Save valid edits or click Cancel.	Save persists allowed item changes; Cancel closes without altering the item.		
Delete Inventory Batch Modal	Click delete on an eligible batch and then Cancel.	The confirmation closes and the batch and stock totals remain unchanged.		
Delete Inventory Batch Modal	Confirm deletion of an eligible batch.	The batch is removed once, totals recalculate, and blocked dependent batches display an explanatory error instead.		
Branch Management	Open branches, search, and click Add Branch.	The authorized branch list and an add form with required branch information display.		
Add/Edit Branch Modal	Submit invalid or duplicate branch information.	Validation displays and no invalid or duplicate branch is saved.		
Add/Edit Branch Modal	Click Cancel or submit valid branch information and click Done.	Cancel preserves data; Done creates or updates one branch and refreshes the list.
