

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Admin		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Branch Status Modal	Choose Activate or Deactivate and click Cancel.		The modal closes and branch status remains unchanged.		
Branch Status Modal	Confirm Activate or Deactivate.		The branch status updates once and dependent assignment restrictions are enforced with a clear message when blocked.		
Branch Analytics	Click View Analytics, change filters, clear them, and export CSV or PDF.		Charts and totals reflect the selected branch and period; Clear restores defaults and exports match the displayed scope.		
Branch Analytics Modal	Open branch analytics details and click Close.		The selected branch metrics display and Close returns to Branch Management.		
System Configuration	Switch among configuration sections and website-content tabs.		The selected settings form displays its current saved values without saving tab navigation alone.		

System Configuration	Edit clinic, appointment, email-template, feature, or website-content values and click Reset Default.	A default or confirmation state displays and no reset is persisted until the required confirmation or save occurs.		
System Configuration	Add or remove a procedure or website service card, then click Cancel or leave without saving.	Unsaved list changes are discarded and the last saved configuration remains active.		
System Configuration	Upload valid supported media, then use Reset Media.	The preview updates for valid media; Reset restores the configured default after confirmation and unsupported files show validation.		
System Configuration	Save valid settings and click OK on feedback.	A success message displays, OK closes it, settings persist, and affected public or booking pages use the new values.		
System Configuration	Save invalid configuration values.	Validation or an error message displays and the last valid configuration remains active.		
Database Backup	Open Backup and click Refresh.	Current backup status, schedule, retention, verification, and history reload without starting a backup.		

Database Backup	Click Create Backup Now and cancel its confirmation.	The confirmation closes and no manual backup job is started.		
Database Backup	Confirm Create Backup Now.	One backup job starts, progress or status displays, and a completed or failed history entry is recorded.		
Database Backup	Edit automatic schedule or retention using invalid values and save.	Validation displays and existing backup settings remain unchanged.		
Database Backup	Save a valid automatic schedule and retention setting.	A success state displays and the settings persist after Refresh or reopening the page.		
Database Backup	Click Verify on a completed backup.	Verification runs for the selected file and records a valid or failed integrity result without changing the backup.		
Database Backup	Click Download on a completed backup.	The selected backup downloads with the expected file identity; unavailable files show a clear error.		

Integrity Tools	Run one integrity check or Run All.	Each requested check reports status, affected-record count, and expandable details without modifying data.		
Integrity Tools	Expand and collapse affected records.	The selected issue details display and collapse without changing any record.		
Safe Auto-Fix Modal	Open Safe Auto-Fix and click Cancel.	The modal closes and no affected record changes.		
Safe Auto-Fix Modal	Confirm Safe Auto-Fix for an eligible issue.	Only listed safe changes are applied, a result summary displays, rechecking reflects the fix, and the action is audited.		
Archive Review	Refresh, search, and filter archived records by type.	Only matching archived records display with restoration or deletion eligibility and explanatory blockers.		
Restore Archive Modal	Click Restore and then Cancel.	The modal closes and the record remains archived.		
Restore Archive Modal	Confirm Restore for an eligible record.	The record returns once to its active list with a valid restored state and the action is logged.		

Permanent Delete Modal	Click Delete Review and then Cancel.	The confirmation closes and the archived record remains recoverable.
