

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Branch Manager		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Login Page	Open the Ngitify web URL.		The Login page displays the Ngitify branding, email and password fields, password visibility control, Forgot Password link, and Login button.		
Login Page	Click the password visibility control.		The password switches between masked and visible text without changing its value.		
Login Page	Click Login with both fields blank or with an invalid email format.		Required-field or email- format validation displays and no login request is completed.		
Login Page	Enter incorrect credentials and click Login.		An authenticatio n error displays, protected pages remain inaccessible, and the entered password is not exposed.		

Login Page	Enter valid active-account credentials and click Login.	The system creates an authenticated session and opens the dashboard authorized for that account's role.		
Forgot Password	Click Forgot Password, enter a registered email, and click Send Code.	The reset-code screen displays and the system sends or queues one OTP for the registered account without revealing account details.		
Forgot Password	Enter an invalid, expired, or incomplete OTP and submit it.	The OTP error displays and the password reset fields remain unavailable.		
Forgot Password	Click Resend Code after the resend control becomes available.	A new OTP is issued, the resend timer restarts, and the previous OTP can no longer complete the reset.		
Forgot Password	Verify a valid OTP, enter mismatched or noncompliant passwords, and click Reset Password.	Password validation displays and the account password is not changed.		
Forgot Password	Verify a valid OTP, enter matching valid passwords, and click Reset Password.	A success message displays, Go to Login is available, and the new password works while the old password does not.		

Forgot Password	Click Back to Login or Go to Login.	The Login page displays and temporary reset inputs are cleared.		
Role Navigation	Open the sidebar and review its menu entries.	Only pages authorized for the signed-in role display; restricted-role menu entries are absent.		
Role Navigation	Click each visible sidebar menu item and the sidebar collapse or expand control.	Each item opens its named page, the active item is identified, and collapsing or expanding does not lose the current page.		
Protected Routes	Paste a protected URL belonging to another role into the address bar.	The system blocks the page and redirects to an authorized page or Access Denied view without exposing restricted data.		
Session	Remain inactive until the session warning appears, then click Stay Logged In.	The warning closes, the authenticated session is renewed, and the current unsaved page remains displayed.		
Session	Let the session warning expire without choosing Stay Logged In.	The session ends, protected data is cleared from view, and the Login page displays.		

Logout Modal	Click Logout from the account or sidebar menu.	A Confirm Logout modal displays with Yes, Logout and Cancel controls; the session remains active until confirmed.		
Logout Modal	Click Cancel or close the Confirm Logout modal.	The modal closes and the user remains signed in on the current page.		
Logout Modal	Click Yes, Logout in the Confirm Logout modal.	The session ends, the Login page displays, and browser Back cannot reopen protected content.		
Notifications	Click the notification bell.	The Notifications page or panel displays the current unread count and notifications permitted for the signed-in user.		
Notifications	Use notification search and type or read-status filters, then clear them.	The list shows only matching notifications; clearing filters restores the complete authorized list.		
Notifications	Open an unread notification and close its details.	The notification details display, the item becomes read, the unread count decreases, and Close returns to the list.		

Notifications	Click Mark All as Read.	All currently accessible unread notifications become read and the unread badge updates to zero.		
Notifications	Click Mark as Unread or Mark as Read on an item.	The selected item's read state and the unread badge update consistently without changing other items.		
Notifications	Click Previous or Next in a multi-page notification list.	The requested page loads once, page information updates, and navigation is disabled at the first or last page.
