

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Branch Manager		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Add Patient	Click Add Patient and submit blank, malformed, or duplicate identity and contact data.		Required, format, and possible- duplicate messages display and no duplicate patient is created.		
Add Patient	Complete identity, contact, medical or dental, and consent steps using Continue and Back.		Each step retains valid entered data, prevents invalid progression, and displays the appropriate consent information.		
Add Patient Modal	Click Cancel or close before completion.		The form closes and no patient record is created.		
Add Patient	Submit a complete valid patient record and confirm required consent.		One patient record is created, a success state displays, and the patient appears in authorized lists.		
Duplicate Patient	Choose Open Existing Record after a possible duplicate is found.		The existing patient's authorized detail view opens and no additional patient is created.		

Patient Details	Click View on a patient and then Close or Back.	The selected patient's authorized details display; Close or Back returns to the same filtered list.		
Edit Patient	Save valid non-clinical patient changes.	The existing patient updates once and the new information persists in staff and patient profile views as permitted.		
Edit Patient	Enter invalid values or click Cancel.	Validation prevents invalid saving; Cancel preserves the original patient record.		
Patient Lifecycle Modal	Choose Activate, Deactivate, Archive, or Restore and click Cancel.	The modal closes and the patient's lifecycle status and access remain unchanged.		
Patient Lifecycle Modal	Provide the required reason and click Confirm.	The permitted lifecycle change completes, list placement and account access update, and the action is logged.		
Transfer Patient Branch	Open Transfer Branch and review the target branch, upcoming appointments, and Impact Preview.	The modal accurately identifies records affected by the proposed transfer before any change occurs.		

Transfer Patient Branch Modal	Select a target branch and click Cancel.	The modal closes and the patient's branch and appointments remain unchanged.		
Transfer Patient Branch Modal	Select an allowed target branch, provide a reason, and click Confirm Transfer.	The patient moves once to the target branch, related appointments follow the confirmed handling, and one audit entry is created.		
Branch Analytics	Open Analytics and review summary cards and charts.	Metrics use only the manager's assigned branch and reflect the selected period.		
Branch Analytics	Apply or clear available filters and export CSV or PDF.	Charts recalculate for the filters, Clear restores defaults, and exports contain only assigned-branch data.		
Inventory Management	Open Inventory and search or review item and batch information.	Only inventory available to the assigned branch displays with accurate stock and warning states.		
Inventory Modal	Add, edit, receive, or delete an inventory item or batch and click Cancel.	The modal closes and inventory remains unchanged.		
Inventory Modal	Submit valid allowed item or batch changes.	The branch inventory updates once, totals recalculate, and an activity record is created.		

Branch Scope	Attempt to view or modify another branch through a copied URL or altered request.	The request is rejected or redirected and no other-branch data is exposed or changed.
