

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Dentist		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Appointment Status Modal	Select Confirm, In Clinic, Complete, or another allowed next status and click Cancel.		The confirmation closes and the appointment retains its previous status.		
Appointment Status Modal	Select an allowed next status and click Confirm or Update Status.		The status changes once, the schedule refreshes, and the patient- facing appointment and related notification reflect the change.		
Cancel Appointment Modal	Click Cancel Appointment, enter or select a reason, then close or click Cancel.		The modal closes and the appointment remains active with its previous status.		
Cancel Appointment Modal	Click Cancel Appointment, provide required information, and confirm cancellation.		The appointment becomes cancelled, the slot is released when applicable, and the patient sees the cancellation and notification.		

Guest Appointment	Open an eligible guest request and click Confirm Guest Request.	The request becomes a confirmed appointment without creating duplicate schedule entries.		
Guest Appointment	Click Register or Link Patient and choose an existing match or create a valid patient.	The appointment links to exactly one patient record and retains its original request details.		
Guest Appointment	Click Resend Link for an eligible guest request.	The activation or registration link is reissued once and a success or recoverable delivery message displays.		
Schedule Pagination	Click Previous or Next in a multi-page schedule.	The requested page displays with no duplicate rows, and the controls disable at the boundaries.		
Dentist Dashboard	Open Dashboard and review today's schedule, assigned patients, alerts, summary data, and calendar.	Only dentist-authorized appointments and patients display with accurate current status.		
Dentist Dashboard	Click View EMR, Manage Patients, Manage Appointments, or a visible shortcut.	The selected patient or management page opens within the dentist's authorized assignment scope.		

Dentist Dashboard	Use calendar previous, next, or date controls and close an alert.	The selected schedule period displays and closing the alert does not change clinical or appointment data.		
Dentist Patients	Search assigned patients and click View EMR.	Only assigned or otherwise authorized patients display and the selected patient's EMR opens.		
Patient EMR	Switch among Overview, Medical and Dental History, Treatment History, Odontogram, and Radiograph Images.	Each tab displays the selected patient's latest matching clinical data without mixing patient records.		
Medical and Dental History	Click Edit Medical History, change fields, and click Cancel.	The editor closes and the previously saved clinical history remains unchanged.		
Medical and Dental History	Save valid history changes.	The history updates once with recorder and time information and becomes visible in authorized patient records.		
Treatment Log Modal	Click Add Treatment Log, enter incomplete or invalid information, and save.	Validation displays and no treatment log is created.		
Treatment Log Modal	Enter treatment information and click Cancel.	The modal closes and treatment history remains unchanged.		

Treatment Log Modal	Submit a valid treatment log.	One chronological treatment entry is created for the selected patient and appears in authorized patient records.		
Delete Treatment Modal	Open delete confirmation and click Cancel.	The confirmation closes and the treatment entry remains.		
Delete Treatment Modal	Confirm deletion of an eligible treatment entry.	The selected entry is removed or archived once and the action is audited; blocked entries display a reason.		
Treatment History	Search or filter by date and click Export PDF.	Only matching treatment entries display and the generated PDF represents the selected patient's authorized history.		
EMR Print Preview	Open print preview, then click Close or Print.	Close returns without printing; Print opens the system print workflow for the selected patient's formatted record.		
Odontogram	Select a tooth and open its update modal.	The modal displays the selected tooth number and its latest saved condition and treatment fields.		

Odontogram Modal	Change tooth information and click Cancel.	The modal closes and the odontogram remains unchanged.		
Odontogram Modal	Save valid tooth information.	The selected tooth updates once, the odontogram redraws, and the change appears in authorized patient records.
