

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI-DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Patient		
Date Tested	08/25/2026	Type of System	Mobile Application		
Pre-conditions	Install and open the mobile app; use prepared patient, appointment, notification, and clinical test data				
Verification Steps	Execute every listed action on supported mobile devices and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Mobile Login	Launch the Ngitify mobile application.		The Login screen displays branding, email and password fields, password visibility, Forgot Password, and Login controls without clipped content.		
Mobile Login	Tap the password visibility icon.		The password switches between masked and visible text without altering its value.		
Mobile Login	Tap Login with blank, malformed, or incorrect credentials.		Field or authentication errors display and the patient dashboard does not open.		
Mobile Login	Enter valid active patient credentials and tap Login.		A patient session is created and the privacy, onboarding, or Home screen opens according to the account's completion state.		

Mobile Forgot Password	Tap Forgot Password, enter a registered email, and tap Send Code.	The OTP screen displays, one reset code is issued, and no sensitive account details are revealed.		
Mobile Forgot Password	Submit an invalid or expired OTP, then tap Resend when enabled.	The invalid code is rejected; Resend issues a new code and restarts its timer.		
Mobile Forgot Password	Verify a valid OTP but submit mismatched or weak new passwords.	Password validation displays and the current password remains valid.		
Mobile Forgot Password	Verify a valid OTP and submit matching compliant passwords.	A success state displays, Go to Login or Close returns to Login, and only the new password authenticates.		
Privacy Consent	Review Privacy Information and tap Close.	The privacy details close and the consent screen remains displayed without recording consent.		
Privacy Consent	Tap I Agree and Continue.	Consent is recorded once and the next incomplete onboarding screen or dashboard opens.		
Onboarding	Tap Get Started on the Welcome screen.	The preferred-name onboarding screen displays and progress begins for the signed-in patient.		

Onboarding	Enter a preferred name and tap Continue, or tap Skip.	A valid name is saved when provided; Skip leaves it optional and opens the next onboarding step.		
Onboarding	Complete or skip Help Focus, Routine, and Experience screens.	Each selection or skip state is saved once and the next onboarding screen displays in sequence.		
Onboarding Notifications	Choose reminder preferences and tap Save Preferences, or tap Skip.	Chosen preferences persist; Skip retains defaults and both actions continue onboarding.		
Onboarding Ready	Tap Go to Dashboard or another displayed next action such as Log Today.	Onboarding is marked complete and the selected Home or Oral Care destination opens.		
Mobile Navigation	Tap Home, Health, Visits, Records, and Profile in the bottom navigation.	Each tab opens the matching patient screen and the selected tab remains visually active.		
Mobile Home	Open Home and review summary cards, today's information, upcoming appointment, and Recommended Visit Window.	The dashboard displays the signed-in patient's current data and appropriate empty, loading, or retry states.		

Mobile Home	Tap a visible appointment, Oral Health, Recommended Visit Window, notification, or profile shortcut.	The matching detail screen or modal opens with the selected patient's data.		
Mobile Logout Modal	Tap Logout and then Cancel or close the modal.	The modal closes and the patient remains signed in on the current screen.		
Mobile Logout Modal	Tap Logout and confirm Logout.	The patient session ends, Login displays, and protected mobile screens cannot be reopened.		
Mobile Appointment Booking	Tap Book Appointment and use Back and Next through branch, date, time, service, and notes steps.	Valid choices persist between steps, unavailable selections are disabled, and missing required choices prevent progression.		
Mobile Appointment Booking	Open the privacy summary and tap I Understand or close it.	The summary closes; I Understand records acknowledgment while Close alone does not submit the booking.		
Mobile Appointment Booking	Submit a complete booking with an available slot.	One appointment request is created, a success state displays, and it appears under Visits and the staff schedule.		

Mobile Appointment Booking	Submit after the selected slot becomes unavailable or the request fails.	A recoverable error and Retry or reselection option display, and no duplicate appointment is created.		
Mobile Visits	Open Upcoming and Past appointments and tap an appointment.	The appropriate appointment list and selected appointment details display with actions valid for its status.
