

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Owner		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Add Patient	Click Add Patient and submit blank, malformed, or duplicate identity and contact data.		Required, format, and possible- duplicate messages display and no duplicate patient is created.		
Add Patient	Complete identity, contact, medical or dental, and consent steps using Continue and Back.		Each step retains valid entered data, prevents invalid progression, and displays the appropriate consent information.		
Add Patient Modal	Click Cancel or close before completion.		The form closes and no patient record is created.		
Add Patient	Submit a complete valid patient record and confirm required consent.		One patient record is created, a success state displays, and the patient appears in authorized lists.		
Duplicate Patient	Choose Open Existing Record after a possible duplicate is found.		The existing patient's authorized detail view opens and no additional patient is created.		

Patient Details	Click View on a patient and then Close or Back.	The selected patient's authorized details display; Close or Back returns to the same filtered list.		
Edit Patient	Save valid non-clinical patient changes.	The existing patient updates once and the new information persists in staff and patient profile views as permitted.		
Edit Patient	Enter invalid values or click Cancel.	Validation prevents invalid saving; Cancel preserves the original patient record.		
Patient Lifecycle Modal	Choose Activate, Deactivate, Archive, or Restore and click Cancel.	The modal closes and the patient's lifecycle status and access remain unchanged.		
Patient Lifecycle Modal	Provide the required reason and click Confirm.	The permitted lifecycle change completes, list placement and account access update, and the action is logged.		
Transfer Patient Branch	Open Transfer Branch and review the target branch, upcoming appointments, and Impact Preview.	The modal accurately identifies records affected by the proposed transfer before any change occurs.		

Transfer Patient Branch Modal	Select a target branch and click Cancel.	The modal closes and the patient's branch and appointments remain unchanged.		
Transfer Patient Branch Modal	Select an allowed target branch, provide a reason, and click Confirm Transfer.	The patient moves once to the target branch, related appointments follow the confirmed handling, and one audit entry is created.		
Branch Management	Open Branches, search, and review branch information and status.	All owner-authorized branches display with accurate status and operational summary information.		
Branch Management	Click Add Branch and submit invalid or duplicate information.	Required and duplicate validation display and no branch is created.		
Branch Modal	Enter branch information and click Cancel.	The modal closes and no branch information changes.		
Branch Modal	Submit valid Add or Edit branch information and click Done.	One branch is created or updated and the saved details persist in branch and assignment views.		
Branch Status Modal	Open Activate or Deactivate and click Cancel.	The confirmation closes and the branch retains its current status.		

Branch Status Modal	Confirm the allowed status change.	The branch status updates once; blocked dependencies show a reason and leave the branch unchanged.		
Branch Analytics	Open analytics, apply branch or date filters, clear them, and export CSV or PDF.	Metrics reflect the selected scope, Clear restores defaults, and exports match the displayed data.		
Inventory Management	Search and review item stock, batch history, expiry, and low-stock states.	Current authorized inventory and accurate calculated totals display.		
Inventory Management	Add or edit an item or receive a batch, then click Cancel.	The modal closes and inventory quantities and item information remain unchanged.		
Inventory Management	Save a valid item edit or received batch.	The item or batch persists once and totals and warning states recalculate.		
Inventory Batch Modal	Open batch deletion and click Cancel, then repeat and confirm an eligible deletion.	Cancel preserves the batch; Confirm removes it once or displays a dependency blocker and updates totals.		
Material Usage	Open Material Usage, search, filter by date, and expand a log.	Only matching authorized logs display and expansion shows the appointment, patient, item, quantity, and recorder details.
