

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Secretary		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Activity Logs	Open Activity Logs, search, choose a date range, and clear the filters.		Only matching activities display; clearing filters restores the authorized activity history.		
Activity Logs	Click View Details on an activity and then Close.		The detail modal identifies the action, actor, target, time, and available metadata; Close returns to the unchanged list.		
Activity Logs	Click Export CSV.		A CSV containing the currently authorized activity records downloads with readable column headings.		
Profile	Open My Profile and review the displayed account information.		The signed-in user's current profile, role, and branch information display without another user's data.		
Profile	Click Edit Profile, change valid editable fields, and click Cancel.		The edit view closes or resets and no profile change is saved.		

Profile	Click Edit Profile, enter invalid data, and click Save or Confirm.	Field-specific validation displays and the invalid profile is not saved.		
Profile	Save valid profile changes and click Confirm or OK in the confirmation modal.	A success state displays and the updated values persist in the profile and relevant account views.		
Account Settings	Enter an incorrect current password or mismatched new passwords and submit Change Password.	An error displays, the password remains unchanged, and the user stays signed in.		
Account Settings	Submit a valid current password and matching compliant new password.	The password changes successfully and the system applies its configured re-login behavior.		
Account Settings	Change notification preferences and click Save Notifications.	A success message displays and the selected preferences persist after reopening Settings.		
NgitiBot	Open NgitiBot from the visible menu or button, enter a message, and click Send.	The conversation opens, the patient-safe prompt is submitted once, and a response or clear recoverable error displays.		

NgitiBot	Use New Chat, conversation history, rename, archive, or delete controls.	The selected conversation action is reflected in the visible history and does not alter unrelated chats.		
NgitiBot Modal	Open a rename, archive, or delete confirmation and click Cancel.	The modal closes and the conversation name and state remain unchanged.		
NgitiBot Modal	Open a rename, archive, or delete confirmation and click Confirm or Delete.	The requested action completes once, a status message displays when applicable, and the chat list refreshes.		
Schedule Management	Open Schedule Management and review the calendar or appointment table.	Authorized appointments display with patient, dentist, branch, schedule, and status information appropriate to the signed-in role.		
Schedule Management	Search appointments and apply date, dentist, branch, or status filters, then click Clear.	Only matching appointments display and Clear restores the default authorized schedule.		
Schedule Management	Click Export CSV and Export PDF.	Each file downloads with the currently authorized schedule data and readable headings.		

Add Schedule Entry	Click Add Schedule Entry, choose an existing patient, and complete valid appointment fields.	The form displays available patient, branch, dentist, service, date, time, and notes controls and accepts valid values.		
Add Schedule Entry	Choose Add New Patient and submit missing, invalid, or duplicate identity information.	Required or duplicate warnings display and neither a patient nor appointment is created.		
Add Schedule Entry Modal	Enter appointment information and click Cancel or close the modal.	The modal closes, no appointment is created, and the previous schedule remains displayed.		
Add Schedule Entry Modal	Submit a valid available schedule entry.	One appointment is created, a success message displays, and the entry appears in the staff schedule and patient's appointments .		
Appointment Details	Click View on a schedule entry.	The details modal displays the selected appointment and only actions permitted for its current status and the user's role.		
Appointment Details Modal	Click Close or the modal close icon.	The details modal closes without changing the appointment.		

Edit Appointment	Click Edit or Full Update, change valid fields, and save.	The existing appointment updates once, availability is revalidated, and the changed details appear across staff and patient views.		
Edit Appointment	Enter conflicting or invalid appointment information and save.	A clear validation or availability error displays and the existing appointment remains unchanged.
