

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI-DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Secretary		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Patient Lifecycle Modal	Provide the required reason and click Confirm.		The permitted lifecycle change completes, list placement and account access update, and the action is logged.		
Transfer Patient Branch	Open Transfer Branch and review the target branch, upcoming appointments, and Impact Preview.		The modal accurately identifies records affected by the proposed transfer before any change occurs.		
Transfer Patient Branch Modal	Select a target branch and click Cancel.		The modal closes and the patient's branch and appointments remain unchanged.		
Transfer Patient Branch Modal	Select an allowed target branch, provide a reason, and click Confirm Transfer.		The patient moves once to the target branch, related appointments follow the confirmed handling, and one audit entry is created.		

Patient View	Open a patient and click View EMR.	The patient's authorized record displays in read-only form for the secretary; dentist-only clinical edit controls are absent.		
Patient View	Click Edit Profile, save allowed demographic changes, and return with Back.	Allowed non-clinical changes persist and Back returns to the selected patient or list.		
Secretary Scope	Attempt to open another branch's patient or appointment using a copied URL.	Access is denied or redirected and no out-of-branch data is exposed or changed.
