

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Patient		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Activity Logs	Open Activity Logs, search, choose a date range, and clear the filters.		Only matching activities display; clearing filters restores the authorized activity history.		
Activity Logs	Click View Details on an activity and then Close.		The detail modal identifies the action, actor, target, time, and available metadata; Close returns to the unchanged list.		
Activity Logs	Click Export CSV.		A CSV containing the currently authorized activity records downloads with readable column headings.		
Profile	Open My Profile and review the displayed account information.		The signed-in user's current profile, role, and branch information display without another user's data.		
Profile	Click Edit Profile, change valid editable fields, and click Cancel.		The edit view closes or resets and no profile change is saved.		

Profile	Click Edit Profile, enter invalid data, and click Save or Confirm.	Field-specific validation displays and the invalid profile is not saved.		
Profile	Save valid profile changes and click Confirm or OK in the confirmation modal.	A success state displays and the updated values persist in the profile and relevant account views.		
Account Settings	Enter an incorrect current password or mismatched new passwords and submit Change Password.	An error displays, the password remains unchanged, and the user stays signed in.		
Account Settings	Submit a valid current password and matching compliant new password.	The password changes successfully and the system applies its configured re-login behavior.		
Account Settings	Change notification preferences and click Save Notifications.	A success message displays and the selected preferences persist after reopening Settings.		
NgitiBot	Open NgitiBot from the visible menu or button, enter a message, and click Send.	The conversation opens, the patient-safe prompt is submitted once, and a response or clear recoverable error displays.		

NgitiBot	Use New Chat, conversation history, rename, archive, or delete controls.	The selected conversation action is reflected in the visible history and does not alter unrelated chats.		
NgitiBot Modal	Open a rename, archive, or delete confirmation and click Cancel.	The modal closes and the conversation name and state remain unchanged.		
NgitiBot Modal	Open a rename, archive, or delete confirmation and click Confirm or Delete.	The requested action completes once, a status message displays when applicable, and the chat list refreshes.		
Patient Dashboard	Open Dashboard and review date controls, appointment summary, Oral Care, and Recommended Visit Window.	Only the signed-in patient's current information displays with appropriate loading, empty, and retry states.		
Patient Dashboard	Click My Appointments, Details, Open My Appointments, or Oral Care.	The matching patient page or selected appointment detail opens.		
Recommended Visit Window Modal	Click Why am I seeing this, then Close.	The modal explains the recommendation's patient-safe source and timing; Close returns to Dashboard without changing data.		
Patient Appointments	Switch between Upcoming, History, and Book views.	The selected tab displays the correct signed-in patient's appointment state and valid actions.		

Patient Appointment Details	Click Details and then Close.	The selected appointment's branch, dentist, service, schedule, status, and notes permitted to the patient display; Close returns to the list.		
Patient Booking	Click Book New Appointment and proceed through required branch, service, date, time, and notes controls.	Available options display, missing required choices block progression, and selected values persist through Review and Back.		
Patient Booking Privacy Modal	Open the privacy summary and click Close.	The summary closes without submitting the request or changing entered booking details.		
Patient Booking	Submit a valid available appointment request.	One request is created, the success modal displays, and the appointment appears in the patient's list and staff schedule.		
Patient Booking Success Modal	Click Close or Go to Appointments.	Close dismisses the modal; Go to Appointments opens the created request in the appointments page.		

Patient Booking	Submit after a slot conflict or simulated request failure, then click Try Again.	A clear error displays, no duplicate request is created, and Try Again resubmits or reloads safely.		
Patient Reschedule Modal	Choose Reschedule and click Back or Close.	The modal closes and the original appointment schedule remains unchanged.
