

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI- DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Patient		
Date Tested	08/25/2026	Type of System	Web Application		
Pre-conditions	Open a supported browser; use prepared accounts and test data for the stated role and branch scope				
Verification Steps	Enter the correct URL, execute every listed action, and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Patient Reschedule Modal	Choose an available replacement slot and confirm.		The existing appointment updates once and both patient and staff schedule views show the new time.		
Patient Cancellation Modal	Choose Cancel Appointment and click Back or Close.		The modal closes and the appointment remains active.		
Patient Cancellation Modal	Provide the required reason and confirm cancellation.		The appointment becomes cancelled once and the patient receives confirmation or a related notification.		
Medical Records	Switch among all visible record tabs and click Try Again after a load failure.		Each authorized section shows the latest patient record; Try Again reloads without duplicating entries.		
Medical Records - Treatments	Expand and collapse a treatment entry.		The selected treatment details display and collapse without altering the clinical record.		

Medical Records - Odontogram	Select a tooth.	The tooth's latest dentist-recorded status displays read-only.		
Medical Records - Radiographs	Open an authorized radiograph and then Close.	The correct image and approved patient explanation display; Close returns to Records.		
Oral Care - Today	Select a date, mark care items, enter symptom details, and save the daily log.	The log saves once and the same values display when that date is reopened.		
Oral Care Symptom Modal	Change symptom severity or notes and click Close or Done.	Done applies valid details; closing without applying preserves the previous saved values.		
Oral Care - History	Open History or Calendar and select a logged date.	The selected date's saved oral-care information displays accurately.		
Oral Care - Trends	Switch between 7-day and 30-day views.	Trend values and risk factors recalculate for the selected range using only the patient's logs.		
Oral Care	Click Book Preventive Visit or Open NgitiBot.	The booking page or NgitiBot opens with relevant patient-safe oral-care context.		
Dental Health Education	Search topics, select a category, click Show All, and open a topic.	The library filters correctly and the selected patient-safe article opens.		

Dental Health Education	Click Open NgitiBot from a topic.	NgitiBot opens with the selected education context and does not expose restricted clinical notes.		
Patient Settings	Click View Profile, Edit Profile, or Activity Logs.	Each shortcut opens the signed-in patient's corresponding page.		
Change Email Modal	Open Change Email and click Cancel.	The modal closes and the current email remains unchanged.		
Change Email Modal	Submit a valid unused email, verify credentials if requested, and click OK.	A verification or success message displays; OK closes it and the email changes only after required verification.		
Patient Privacy Settings	Change visible privacy or data-sharing controls and save.	Allowed choices persist and affect only the configured patient-facing sharing behavior.		
Patient Scope	Alter a record or appointment URL to reference another patient.	Access is denied and no other patient's appointments , profile, or clinical records display.
