

INTEGRATION TEST DOCUMENT		Application/System Name	NGITIFY: A DENTAL INFORMATION MANAGEMENT SYSTEM WITH AI-DRIVEN PATIENT ENGAGEMENT FOR DENTIME DENTAL CLINIC		
Test Cycle No.	1	User/Access Type	Patient		
Date Tested	08/25/2026	Type of System	Mobile Application		
Pre-conditions	Install and open the mobile app; use prepared patient, appointment, notification, and clinical test data				
Verification Steps	Execute every listed action on supported mobile devices and record Actual Results and Remarks				
Modules	Action Description		Expected Results	Actual Results	Remarks
Mobile Login	Launch the Ngitify mobile application.		The Login screen displays branding, email and password fields, password visibility, Forgot Password, and Login controls without clipped content.		
Mobile Login	Tap the password visibility icon.		The password switches between masked and visible text without altering its value.		
Mobile Login	Tap Login with blank, malformed, or incorrect credentials.		Field or authentication errors display and the patient dashboard does not open.		
Mobile Login	Enter valid active patient credentials and tap Login.		A patient session is created and the privacy, onboarding, or Home screen opens according to the account's completion state.		

Mobile Forgot Password	Tap Forgot Password, enter a registered email, and tap Send Code.	The OTP screen displays, one reset code is issued, and no sensitive account details are revealed.		
Mobile Forgot Password	Submit an invalid or expired OTP, then tap Resend when enabled.	The invalid code is rejected; Resend issues a new code and restarts its timer.		
Mobile Forgot Password	Verify a valid OTP but submit mismatched or weak new passwords.	Password validation displays and the current password remains valid.		
Mobile Forgot Password	Verify a valid OTP and submit matching compliant passwords.	A success state displays, Go to Login or Close returns to Login, and only the new password authenticates.		
Privacy Consent	Review Privacy Information and tap Close.	The privacy details close and the consent screen remains displayed without recording consent.		
Privacy Consent	Tap I Agree and Continue.	Consent is recorded once and the next incomplete onboarding screen or dashboard opens.		
Onboarding	Tap Get Started on the Welcome screen.	The preferred-name onboarding screen displays and progress begins for the signed-in patient.		

Onboarding	Enter a preferred name and tap Continue, or tap Skip.	A valid name is saved when provided; Skip leaves it optional and opens the next onboarding step.		
Onboarding	Complete or skip Help Focus, Routine, and Experience screens.	Each selection or skip state is saved once and the next onboarding screen displays in sequence.		
Onboarding Notifications	Choose reminder preferences and tap Save Preferences, or tap Skip.	Chosen preferences persist; Skip retains defaults and both actions continue onboarding.		
Onboarding Ready	Tap Go to Dashboard or another displayed next action such as Log Today.	Onboarding is marked complete and the selected Home or Oral Care destination opens.		
Mobile Navigation	Tap Home, Health, Visits, Records, and Profile in the bottom navigation.	Each tab opens the matching patient screen and the selected tab remains visually active.		
Mobile Home	Open Home and review summary cards, today's information, upcoming appointment, and Recommended Visit Window.	The dashboard displays the signed-in patient's current data and appropriate empty, loading, or retry states.		

Mobile Home	Tap a visible appointment, Oral Health, Recommended Visit Window, notification, or profile shortcut.	The matching detail screen or modal opens with the selected patient's data.		
Mobile Logout Modal	Tap Logout and then Cancel or close the modal.	The modal closes and the patient remains signed in on the current screen.		
Mobile Logout Modal	Tap Logout and confirm Logout.	The patient session ends, Login displays, and protected mobile screens cannot be reopened.		
Mobile Appointment Booking	Tap Book Appointment and use Back and Next through branch, date, time, service, and notes steps.	Valid choices persist between steps, unavailable selections are disabled, and missing required choices prevent progression.		
Mobile Appointment Booking	Open the privacy summary and tap I Understand or close it.	The summary closes; I Understand records acknowledgment while Close alone does not submit the booking.		
Mobile Appointment Booking	Submit a complete booking with an available slot.	One appointment request is created, a success state displays, and it appears under Visits and the staff schedule.		

Mobile Appointment Booking	Submit after the selected slot becomes unavailable or the request fails.	A recoverable error and Retry or reselection option display, and no duplicate appointment is created.		
Mobile Visits	Open Upcoming and Past appointments and tap an appointment.	The appropriate appointment list and selected appointment details display with actions valid for its status.		
Mobile Reschedule Modal	Tap Reschedule, choose a new valid slot, then tap Back or Cancel.	The modal closes and the original appointment schedule remains unchanged.		
Mobile Reschedule Modal	Tap Confirm Reschedule for an available slot.	The existing appointment is updated once and the new time appears in patient and staff schedule views.		
Mobile Cancellation Modal	Tap Cancel Appointment and then Back or close.	The modal closes and the appointment remains active.		
Mobile Cancellation Modal	Provide the required reason and tap Confirm Cancellation.	The appointment becomes cancelled, the released slot is handled correctly, and a notification or confirmation displays.		

Mobile Oral Care - Today	Select a date, mark oral-care items, enter symptom details or severity and notes, then tap Save.	The daily log saves once and its selected values reappear when the same date is reopened.		
Mobile Oral Care Modal	Open symptom details and tap Done or Close.	Done applies valid symptom details; Close without saving preserves the previously saved details.		
Mobile Oral Care - Calendar	Move to the previous or next period and select a logged date.	The calendar changes period and displays the selected date's saved oral-care record.		
Mobile Oral Care - Trends	Switch between 7-day and 30-day views.	Trend summaries recalculate for the selected range using only the patient's saved logs.		
Mobile Oral Care - Education	Search, filter by category, and open an education article.	Matching patient-safe topics display and the selected article opens with its title and content.		
Mobile Records	Open each visible Medical Records tab and use Try Again after a simulated load failure.	The selected authorized record section displays; Try Again reloads it without duplicating data.		
Mobile Records - Treatments	Expand and collapse treatment history or tap Show All.	The selected treatment details display in chronological context and Close returns to the list.		

Mobile Records - Odontogram	Tap a tooth on the odontogram.	The tooth's latest dentist-recorded status displays read-only for the patient.		
Mobile Records - X-Rays	Open an X-ray, tap Explain This Record if available, and tap Back.	The authorized image and approved explanation display; Back returns to the same records position.		
Mobile Notifications	Open an unread notification and return to the list.	The correct details display, the item becomes read, and the unread badge decreases consistently.		
Mobile Notifications	Trigger a loading error and tap Try Again.	The list retries loading and displays either current notifications or a clear empty or error state.		
Mobile Profile	Open Profile and tap Edit Profile, Settings, Activity Logs, or Medical Records.	Each visible shortcut opens its matching patient screen.		
Mobile Edit Profile	Change valid fields or profile image and tap Back or Cancel before saving.	No profile update is committed and the previously saved profile remains displayed.		
Mobile Edit Profile	Enter invalid values and tap Save.	Field validation displays and invalid profile data is not saved.		

Mobile Edit Profile	Save valid changes and tap Confirm or Close on the success modal.	The profile updates once, the success modal closes, and the new values persist across mobile and authorized web views.		
Mobile Settings	Change password using incorrect, mismatched, then valid password values.	Invalid submissions show errors; a valid submission changes the password and applies the configured session behavior.		
Mobile Change Email Modal	Open Change Email and tap Close or Cancel.	The modal closes and the account email remains unchanged.		
Mobile Change Email Modal	Verify the password, submit a valid unused email, and confirm the requested change.	A verification message displays and the email changes only after the required verification process.		
Mobile Settings	Change notification toggles or reminder time and leave and reopen Settings.	The saved preferences persist and control only eligible patient notifications.		
Mobile Activity Logs	Open Activity Logs, tap Load More, then use Back.	Additional authorized activities append without duplicates and Back returns to Profile.		

Mobile NgitiBot	Open NgitiBot, send a message or quick prompt, and close it.	The conversation uses the signed-in patient's allowed context, displays a response or Retry state, and Close returns to the previous screen.		
Mobile NgitiBot Modal	Open rename, archive, or delete and tap Cancel.	The modal closes and the selected conversation remains unchanged.		
Mobile NgitiBot Modal	Confirm rename, archive, or delete.	The selected conversation action completes once and the active or archived chat list refreshes.		
Mobile Pre-Operation	Open the pre-operation instructions and try to continue without required acknowledgement.	The required agreement warning displays and the workflow does not advance.		
Mobile Pre-Operation	Select the agreement checkbox and continue or sign as requested.	Acknowledgement is recorded for the correct patient and the next permitted step displays.
